The kleroterion - a method of random selection.

Introduction - Randviscracy

What it is and How it Works

Randviscracy is a form of government which makes extensive use of randomly selected panels for decision making. The use of randomization in governments is ancient, the Athenians used a device called a kleroterion to randomly select government representatives in a lottery system. Randviscracy takes the process much farther in that for each decision a new panel of randomly selected experts make the decision. Selection is based on experience and IQ level to ensure that the panels are composed of smart and knowledgeable people. This gets to the essence of what ideal government representatives would be: intelligent, incorruptible and knowledgeable.

This book is more than just about Randviscracy itself. It is an analysis of how governments have been exploited and how to prevent it from happening again.

This government's purpose would be ensuring the survival of its people and maximizing their prosperity through protection from force, fraud, corruption and ensuring the maximum

reduction in transaction costs by protecting the nation's people and their property-in-toto (in total). As many services *as practical* would be privatized. There would be exceptions for projects that are too large or have a common benefit to them, such as interstate highway projects, dams and critical infrastructure. These would be voted on and implemented at Federal, State and Local levels, suggested by citizens and groups and approved by randomized panels. New projects would be restrained by a taxation balance system (see taxation section, pg 47). Contract awarding process would also be anonymized and selected by vote from a randomly selected panel.

The decisions of the government and the courts would be based on randomized selection of experts. For example, if a case involved a topic in the field of computer science, then the randomized selection would be from a pool of candidates who have experience in that field. People could voluntarily sign up to be in the pool of experts. They would have to certify their credentials, their education, their experience and training in the field. In this way people would be selected as advisors/instruments of the government such as jurors, decision makers, etc. This would be on a temporary basis and randomly selected. This would make it nearly impossible for the system to become corrupted, because who do you bribe in a system like this? Perhaps the builders of the selection process itself, but this could also be checked by randomly selected experts.

It would be important to keep the pool of experts and selected members a secret. In this way, people who wanted to bribe officials in the government would not even know whom to bribe. Again, as extra protection have independent panels to check the selection process on a random basis to verify integrity. These processes will help ensure there is minimal corruption, which is most government's greatest weakness.

A protection mechanism would make use of fake candidates or officials who would act as monitors to catch attempts at bribery or subversion. For example, let's say there is a panel being created to decide on a new law. A monitor is placed into the pool. If there is a corrupt person with access to the list of selected candidates and the monitor receives a contact in an attempt to influence their decision, they could inform on who is attempting the subversion.

Note: There are technical parts which apply to laws and regulations in the proposed Randviscracy government. You can identify these by the outline format.

The Process of Selection for Random Panels

All use of the term "panel" in this document is referring to randomly selected panels which will use the following selection system:

Panels are selected from citizens with a weighting system based on:

1. years of experience in applicable field and
2. IQ level.

Criminal records which relate to treason, fraud or corruption disqualify citizens from eligibility for selection. The considerations are equally weighted. How this works: a person in the 90% percentile has 10x the chance of being selected as someone in the 9% percentile. The percentiles are combined so that a person with a 90% IQ and 10% experience ranking would have an equal chance of being selected as a person with a 10% IQ and 90% experience percentile ranking.

The idea behind using randomly selected panels is to prevent corruption in the bureaucracy. In modern governments this is known as “lobbying”. It is the process of influencing representatives in the government who have authority over laws which affect a person or industry and creating a conflict of interest by applying pressure on the representative. This pressure can be from for example: bribes and “campaign funding”, blackmail, media pressure (bad press), family connections. The combination of secret, temporary, randomly selected panels and heavy penalties for attempted corruption will greatly limit the ability to influence representatives.

Prevention of stalling mandate

Random panels are to only take the amount of time that it is necessary to become reasonably informed on the subject to feel confident in their decisions. Once a majority of the panel members have reported that their decision is ready, a request for a deadline will be asked of the panel members who have not yet come to a conclusion, the average of these will become the scheduled deadline.

If needed, any citizen can apply for a justification of delay for a case by paying a fee to cover the cost of inquiry. Then the panel members who are not ready must justify their schedule by submitting a report to be reviewed by 3 randomly selected experts in the applicable field (the reviewers). Along with their justification report, the panel will submit a request for a length of time to finish their case. The 3 randomly selected experts will then independently review and approve or reject their request and in the case of a rejection, supply a new suggested deadline. If 2 or more reviewers reject the suggested schedule, the average of their suggested schedules will become the new deadline.

Efficiency of Panel System

To reduce costs, panels can work remotely/telecommute. This also speeds up the process and removes the limitation of candidates being only from the local area.

Automation of panel selection

The final process of selecting who is in a panel is completely automated. The list of who is on the panel cannot be checked or known to anyone outside of the computer system itself until after the case is decided and then only when disputed or selected for a random check. This is ensured by encryption and keeping logs of access.

Potential candidates are entered into the system only through an officially regulated process with identification, IQ testing, training and work experience all being certified.

New cases can be requested via an online portal along with filing fee to cover initial cost, which will be minimal in most cases due to extensive automation. The requester also uploads proposition data files/sources.

Candidates are then automatically randomly selected and contacted by the system. Initial resources/documents are checked for authenticity by AI, the system also contacts personnel/departments for verification in the cases that it cannot. The AI also checks case history and relevant research to form a case file to aid the panel members in their decision.

Panel members will also conduct their own research by having the ability to subpoena records associated with the case. The approval process for this will be automated with a random chance of being selected for independent human review.

At the conclusion of each case, panel members will be able to provide feedback to improve the system. These changes are not to the fundamental process. No changes which are a detriment to the anonymization or affect the impartiality of the panel selection process are allowed.

Panel size

Panel size will be determined by the governing body with jurisdiction over the case/decision with the minimum sizes of panels being;

5 for civil cases.

9 for criminal cases.

11 for state or local non-creation of law, non-military decision or policy making.

101 for city law or tax creation, amendment or nullification.

111 for federal non-creation of law, non-military decision or policy making.
501 for county law or tax creation, amendment or nullification approval.
1,001 for state law or tax creation, amendment or nullification approval.
10,001 for federal law or tax creation, amendment or nullification approval and for declaration of war.

The maximum sizes are 3x the minimum. The panel must be an odd number.

Panels outside of this scope can be any odd number up to 3x over 5 for civil and 11 for government.

The Panel selection system shall not be nullified or superseded by any new laws.

Panel corruption check

0.01% of the total pool of panel members from all levels will be federal undercover officers to protect against attempts at bribery and coercion.

Citizens may request a check of any decision of a panel at their expense. Only 1 check is permitted. The check consists of inquiry into potential corruption or conflict of interests by an independent panel of 3 investigators. If 2 of the 3 investigators discovers evidence of corruption or conflict of interest, a 2nd panel will verify the evidence. If verified the original panel's decision will be nullified, the citizen compensated for legal costs and the panel process repeated.

Corruption of or tampering in the trial/panel process is a treasonable offense of the highest order and punished by public hanging (broadcast) to serve as a warning to others.

Problems with Democracy and How it has been Exploited

Corruption: the Achilles' heel of all governments

All governments from democracies to socialist states are susceptible to corruption via bribes. In America and most other countries around the world there is a system of institutionalized bribery. In America, we are lucky that we have a lot less than many countries but we still have it, more concentrated at the higher levels than in many other governments.

The way elections work in America, politicians depend on these bribes or “political contributions”. They need advertising funds in order to get elected/reelected. The promotional budgets of each candidate can make a big difference in who wins and because of this, they spend most of their time fundraising, i.e. asking for bribes. If you looked at a typical politician’s schedule, you would think they are a telemarketer, they spend so much time on the phone seeking contributions. This system is inherently corrupt because once they are bribed with political contributions, they are expected to do favors in return for those bribes.

Corruption is prevented in Randviscracy via randomly selected panels. Any decision or appointment can be contested and reviewed. Legal costs are paid by the contestor unless corruption is discovered, in which fines of the corrupt persons/entities will pay the legal costs of the contestor, their own legal fees and the costs incurred by the state, in addition to other penalties/fines.

How to destroy a Democracy

In the “[Protocol of the Learned Elders of Zion](#)” you will find a detailed plan on how to exploit the weaknesses of democracy. Here are some excerpts. I will discuss the ramifications of each part. Note: many people dismiss the Protocols as a “forgery”. The original claim of forgery comes from 3 articles written by Philip Graves, a former British intelligence officer, published in the London Times. In these articles, he claims that the Protocols are plagiarized from a book called "Dialogue in Hell between Machiavelli and Montesquieu." Yes, there are parts that are similar enough to be plagiarized. What if the writer of the Protocols had read the Dialogues book and decided that it was a good strategy? Rather than a forgery, it appears that the Protocols adopted parts of its strategic plans from the Dialogues book. The political strategy of the Protocols has been carried out over the last century, which as you will see in the following excerpts. The Protocols detail a precise method of subverting democracy.

6. Political freedom is an idea but not a fact. This idea one must know how to apply whenever it appears necessary with this bait of an idea to attract the masses of the people to one's party for the purpose of crushing another who is in authority. This task is rendered easier if the opponent has himself been infected with the idea of freedom, SO-CALLED LIBERALISM, and, for the sake of an idea, is willing to yield some of his power. It is precisely here that the triumph of our theory appears; the slackened reins of government are immediately, by the law of life, caught up and gathered together by a new hand, because the blind might of the nation cannot for one single day exist without guidance, and the new authority merely fits into the place of the old already weakened by liberalism.

Here you can see that liberalism is like a poison which weakens the defenses of a host country. The blind might are the votes and political power of the people, which can be steered using the media's propaganda via emotional manipulation.

10. Is it possible for any sound logical mind to hope with any success to guide crowds by the aid of reasonable counsels and arguments, when any objection or contradiction, senseless though it may be, can be made and when such objection may find more favor with the people, whose powers of reasoning are superficial? Men in masses and the men of the masses, being guided solely by petty passions, paltry beliefs, traditions and sentimental theorems, fall a prey to party dissension, which hinders any kind of agreement even on the basis of a perfectly reasonable argument. Every resolution of a crowd depends upon a chance or packed majority, which, in its ignorance of political secrets, puts forth some ridiculous resolution that lays in the administration a seed of anarchy.

The tactic of *emotional manipulation* is the bread and butter of the media. Here you can see its source. Most people are easily steered by the emotional content of a story and not the actual logic behind it. Think about this the next time you watch or read a piece by the mainstream media(MSM).

2. The words of the liberal, which are in effect the words of our masonic watchword, namely, "Liberty, Equality, Fraternity," will, when we come into our kingdom, be changed by us into words no longer of a watchword, but only an expression of idealism, namely, into "The right of liberty, the duty of equality, the ideal of brotherhood." That is how we shall put it, - and so we shall catch the bull by the horns ... DE FACTO we have already wiped out every kind of rule except our own, although DE JURE there still remain a good many of them. Nowadays, if any States raise a protest against us it is only PROFORMA at our discretion and by our direction, for THEIR ANTI-SEMITISM IS INDISPENSABLE TO US FOR THE MANAGEMENT OF OUR LESSER BRETHREN. I will not enter into further explanations, for this matter has formed the subject of repeated discussions amongst us.

Here you can see the root of liberalism exposed. Originally it was brought about largely via Freemasonry, in the modern times the primary sources are colleges and media. The noble ideals which these groups spread are actually the poison which weakens the natural in-group preference defense of a society. Freemasonry in essence creates a new in-group preference for Masons, to replace their racial/national in-group preference.

14. In any State in which there is a bad organization of authority, an impersonality of laws and of the rulers who have lost their personality amid the flood of rights ever multiplying out of liberalism, I find a new right - to attack by the right of the strong, and to scatter to the winds all existing forces of order and regulation, to reconstruct all institutions and to become the sovereign lord of those who have left to us the rights of

their power by laying them down voluntarily in their liberalism.

15. Our power in the present tottering condition of all forms of power will be more invincible than any other, because it will remain invisible until the moment when it has gained such strength that no cunning can any longer undermine it.

The preceding excerpt reveals the tactic of first weakening a democratic government by liberalising its laws and government. Then once it is sufficiently weakened, overthrow it with the mob via a socialist revolution. This is why we must be vigilant, you can see the manifestation of this in the revolutionary left via groups like Antifa.

18. In order to elaborate satisfactory forms of action it is necessary to have regard to the rascality, the slackness, the instability of the mob, its lack of capacity to understand and respect the conditions of its own life, or its own welfare. It must be understood that the might of a mob is blind, senseless and unreasoning force ever at the mercy of a suggestion from any side. The blind cannot lead the blind without bringing them into the abyss; consequently, members of the mob, upstarts from the people even though they should be as a genius for wisdom, yet having no understanding of the political, cannot come forward as leaders of the mob without bringing the whole nation to ruin.

20. A people left to itself, i.e., to upstarts from its midst, brings itself to ruin by party dissensions excited by the pursuit of power and honors and the disorders arising therefrom. Is it possible for the masses of the people calmly and without petty jealousies to form judgment, to deal with the affairs of the country, which cannot be mixed up with personal interest? Can they defend themselves from an external foe? It is unthinkable; for a plan broken up into as many parts as there are heads in the mob, loses all homogeneity, and thereby becomes unintelligible and impossible of execution.

The quote “ever at the mercy of a suggestion from any side” reveals one of the major weaknesses of democracy. People with no political training or understanding make decisions with their vote are swayed using emotional manipulation by the media. Furthermore, many politicians are naive to how they are manipulated by political agents. Politicians are chosen for their naivety, as stated in the next excerpt;

2. The administrators, whom we shall choose from among the public, with strict regard to their capacities for servile obedience, will not be persons trained in the arts of government, and will therefore easily become pawns in our game in the hands of men of learning and genius who will be their advisers, specialists bred and reared from early childhood to rule the affairs of the whole world. As is well known to you, these specialists of ours have been drawing to fit them for rule the information they need from our political plans from the lessons of history, from observations made of the events of every moment as it passes. The GOYIM are not guided by practical use of unprejudiced historical observation, but by theoretical routine without any critical

regard for consequent results. We need not, therefore, take any account of them - let them amuse themselves until the hour strikes, or live on hopes of new forms of enterprising pastime, or on the memories of all they have enjoyed. For them let that play the principal part which we have persuaded them to accept as the dictates of science (theory). It is with this object in view that we are constantly, by means of our press, arousing a blind confidence in these theories. The intellectuals of the GOYIM will puff themselves up with their knowledge and without any logical verification of them will put into effect all the information available from science, which our AGENTUR specialists have cunningly pieced together for the purpose of educating their minds in the direction we want.

3. In order to incite seekers after power to a misuse of power we have set all forces in opposition one to another, breaking up their liberal tendencies towards independence. To this end we have stirred up every form of enterprise, we have armed all parties, we have set up authority as a target for every ambition. Of States we have made gladiatorial arenas where a lot of confused issues contend A little more, and disorders and bankruptcy will be universal ...

4. Babblers, inexhaustible, have turned into oratorical contests the sittings of Parliament and Administrative Boards. Bold journalists and unscrupulous pamphleteers daily fall upon executive officials. Abuses of power will put the final touch in preparing all institutions for their overthrow and everything will fly skyward under the blows of the maddened mob.

Many left-wing protesters like to say, "This is what democracy looks like!" Does the previous section not sum up what a modern democracy looks like in reality? The Protocols were written over a hundred years ago. Many claim that they are "forgeries" but whoever wrote them clearly knew the playbook.

Seeds of division rain down from the media on a daily basis to continuously prepare the discord for the eventual fake revolution they put into motion. George Soros alone has put billions of dollars into funding [political action groups](#).

8. In all ages the people of the world, equally with individuals, have accepted words for deeds, for THEY ARE CONTENT WITH A SHOW and rarely pause to note, in the public arena, whether promises are followed by performance. Therefore we shall establish show institutions which will give eloquent proof of their benefit to progress.

9. We shall assume to ourselves the liberal physiognomy of all parties, of all directions, and we shall give that physiognomy a VOICE IN ORATORS WHO WILL SPEAK SO MUCH THAT THEY WILL EXHAUST THE PATIENCE OF THEIR HEARERS AND PRODUCE AN ABHORRENCE OF ORATORY.

10. IN ORDER TO PUT PUBLIC OPINION INTO OUR HANDS WE MUST BRING IT INTO A STATE OF BEWILDERMENT BY GIVING EXPRESSION FROM ALL SIDES TO SO MANY CONTRADICTORY OPINIONS AND FOR SUCH LENGTH OF TIME AS WILL SUFFICE TO MAKE THE "GOYIM" LOSE THEIR HEADS IN THE LABYRINTH AND COME

TO SEE THAT THE BEST THING IS TO HAVE NO OPINION OF ANY KIND IN MATTERS POLITICAL, which it is not given to the public to understand, because they are understood only by him who guides the public. This is the first secret.

11. The second secret requisite for the success of our government is comprised in the following: To multiply to such an extent national failings, habits, passions, conditions of civil life, that it will be impossible for anyone to know where he is in the resulting chaos, so that the people in consequence will fail to understand one another. This measure will also serve us in another way, namely, to sow discord in all parties, to dislocate all collective forces which are still unwilling to submit to us, and to discourage any kind of personal initiative which might in any degree hinder our affair. THERE IS NOTHING MORE DANGEROUS THAN PERSONAL INITIATIVE: if it has genius behind it, such initiative can do more than can be done by millions of people among whom we have sown discord. We must so direct the education of the GOYIM communities that whenever they come upon a matter requiring initiative they may drop their hands in despairing impotence. The strain which results from freedom of actions saps the forces when it meets with the freedom of another. From this collision arise grave moral shocks, disenchantments, failures. BY ALL THESE MEANS WE SHALL SO WEAR DOWN THE "GOYIM" THAT THEY WILL BE COMPELLED TO OFFER US INTERNATIONAL POWER OF A NATURE THAT BY ITS POSITION WILL ENABLE US WITHOUT ANY VIOLENCE GRADUALLY TO ABSORB ALL THE STATE FORCES OF THE WORLD AND TO FORM A SUPER-GOVERNMENT.

In this you can see why people avoid politics. There is a purposeful confusion caused by lack of *logical* direction in instruction and in media political coverage with the substance of political discussion being steered toward the emotional context. A myriad of different theories and political leanings are presented to confuse the public. Look at the multitude of anarchist political groups, socialist groups. Every Democrat and Republican has different political beliefs and no clear platforms for either party.

In the first part you also see the common practice of bait and switch used by politicians. They promise popular changes and reforms to get the support of the people but then after being elected, they proceed with the agenda of their *handlers*.

In the last section of the quote above, you can see the purpose of the antipathy, the nihilism, and the lack of personal initiative that result from "one size fits all" public education systems which are based on animal training techniques and intended to create the [deliberate dumbing down of the population](#).

How are governments exploited? How can these be countered?

(Format: exploit/counter exploit)

1. Bribes - random, private/anonymous panels so it is unknown who to bribe. Severe penalty for bribing and accepting bribes.
2. Blackmail - random, private/anonymous panels so it is unknown who to blackmail. Severe penalties for attempting blackmail. Leniency toward those who voluntarily report that they are being blackmailed.
3. Media pressure (undermining policies, undermining morality of populace, undermining group cohesion, sowing discord, discrediting authority, creating division). - Allow lawsuits against misleading or slanderous media and educational institutions.
4. Diplomatic and economic pressure (threatening of sanctions, tariffs, funding and giving weapons to adversarial nations, refugees/illegal immigration, loans, multinational organizations) - require reciprocity in agreements and return tit for tat (cooperation with cooperation, hostility with hostility). Expose the practice of what that nation is doing to other nations and the World to damage their reputation. Keep it truthful to maintain trustworthiness of information.
5. Military pressure (building bases near borders, territorial disputes, threats/posturing) - make grievances known. Offer a mutually beneficial (reciprocal) proposal. If not then return tit for tat. Make it more expensive for them to not cooperate than to cooperate.
6. Covert pressure (funding guerrillas/dissidents, assassinations, spying, hacking, drug smuggling, supporting criminal activity/mafias, false flags appearing to be another country attacking or false flags being blamed on the country, terrorism) - border controls, immigration controls, security, intelligence, security testing at all levels physical and digital, pay bounties to people who can show exploits and breaches - physical and digital, capital punishment for spies and saboteurs to dissuade other countries from doing so, capital punishment for drug smugglers of hard drugs (those that lead to overdoses/deaths), make attempting a false flag an act of war and not just war but gloves off anything goes war.

How to deal with hostiles

In the past our leaders did not stand for hostile actions by foreign entities. The United States Marine Corps was founded to fight the muslim Barbary pirates who were taking our ships hostage. Both America but many European states had relented to the extortion by paying ransoms for captured ships or paying tribute in advance to avoid piracy for many, many

years(going back centuries to the 1500's). This emboldened the pirates to demand higher and higher ransoms.

In March 1786, two future presidents met with an ambassador from the pirate nations of North Africa. Thomas Jefferson, who was the US ambassador to France, and John Adams, ambassador to Britain, met with the ambassador from Tripoli in London. They asked why American merchant ships were being attacked without provocation.

The ambassador explained that Muslim pirates considered Americans to be infidels and they believed they simply had the right to plunder American ships.¹

You can see the root of this conquering ethos, they believed that because the Americans were infidels that they were fair game for raiding. This ethos is present in many cultures today. We will forever be in a state with war with them until they abandon it. Some Jews have a similar ethos to this day, with one set of morals for jews and another for non-jews aka "goyim" but their actions are done in a more covert way than muslims, to limit blow-back.

Thomas Jefferson put an end to the Barbary pirates. When he became President he refused to pay any tribute. Two months later the pasha of Tripoli declared war on the United States. America sent a fleet of ships and was able to suppress the pirates but later one of their ships, the frigate Philadelphia, ran into a reef and was captured. Later a voluntary force of 80 men along with Lieutenant Stephen Decatur of the U.S. Navy would use a captured Turkish ship to sneak into Tripoli and capture the Philadelphia in a daring raid. They set it ablaze to prevent its use by the pirates. This is where the "...to the shores of Tripoli" in the "Marines Hymn" comes from. This raid led to a treaty with the Barbary states to end the piracy. It is a simple lesson from history, if you make a profitable exploitation into costly liability, the exploiter will change course. If you continue to appease, like the Europeans and later the Americans did with the Barbary pirates for hundreds of years, it will continue. Cause and effect.

Just as this was the policy of America in the past, it should continue to be the policy in the future. The problem is that due to allowing political contributions, the loyalty of politicians has been completely compromised. The perfect example of this is the Israel lobby AIPAC, who require that congressmen sign a pledge of support for Israel and if they refuse, their funding is cut and the funding of their political opponents is increased.²

¹ [The Young U.S. Navy Battled North African Pirates](#)

² [Former Georgia Rep. Says D.C. 'Occupied by Zionists](#)

Israel's influence on American politicians violates the emoluments clause of the US constitution

A nation's sovereignty is susceptible to foreign influence via bribery, blackmail, favors, etc. The founders of the United States knew this very well, they feared it happening to the US. To prevent it they put specific restrictions on accepting gifts, titles and other favors from foreign governments and representatives. It is called the Emoluments Clause, Article 1, Section 9 of the US Constitution.

The Title of Nobility Clause is a provision in Article I, Section 9, Clause 8 of the United States Constitution, which prohibits the federal government from granting titles of nobility, and restricts members of the government from receiving gifts, emoluments, offices or titles from foreign states without the consent of the United States Congress. (From [Wikipedia](#))

A detailed scoreboard on candidates for the Senate and House of Representatives (made by [If Americans Knew](#)) shows that 28 pro-Israel PACs and numerous pro-Israel individuals have given candidates millions of dollars in campaign contributions. The Scoreboard indicates that a substantial number of the 410 incumbents on the ballot in both houses voted pro-Israel most of the time: 355 members of Congress (87%) had a pro-Israel score over 70%.³

America has become a vassal state of Israel. A vassal being an entity which is subordinate to another. Congress members are pressured into signing a loyalty compact which states that they will support the state of Israel. If a congressman does not sign this agreement, the Israel lobby will fund the opposition of the candidate and they will lose their funding.⁴ The tactics of controlling politicians goes far beyond this though. It has also become apparent that blackmail is a common tactic in maintaining control over their puppets.

The case of Jeffrey Epstein, a serial pedophile who owned an island resort where parties featuring underage sex slaves for the wealthy and influential appears to be an example of blackmail control. Epstein has been photographed with many powerful politicians, including the Clintons and Donald Trump. Flight records show that the Clintons made many trips to visit Epstein's "Lolita Island". Hidden cameras are used to get blackmail evidence of the degenerate sexual acts of politicians. This is then used later to ensure that these politicians tow the line of supporting Israeli/Jewish interests.⁵

All this shows the problem with our individualistic society which focuses on getting ahead by any means necessary. It is rife with corruption and moral depravity. This makes our politicians highly susceptible to manipulation and exploitation. We need to return to ideals and principals,

³ [Senate Scoreboard on Israel](#)

⁴ [How soon can we get AIPAC owned traitors out of Congress?](#)

⁵ [Why Did Trump Cabinet Member Let Epstein Walk?](#)

rather than the boiling down of society into materialism. Ideals and morality are the bedrock upon which a civilization stands. Back these principals up with a comprehensive system of corruption prevention.

An ideal society would hold its people and their principals higher than materialistic pursuit. This acts as an immunization against corruption and subversion.

What is a nation – why civic nationalism is destined to fail

The Anti-fascist Dog Breed Melting Pot Act

“All dogs are the same. Chihuahuas and pit-bulls are exactly the same, despite thousands of years of divergent evolution. Stop judging them based on their fur. If you believe they are different you are a fascist. They are all equal. If you prefer having separate and different breeds of dogs and find that the differences are what makes them unique, you are a Nazi sympathizer. Selective breeding and segregation are hate crimes, people should not be allowed to talk about different dog breeds or have dog shows and websites explaining the diversity of dog species, that is hate speech. Dog enthusiasts, aka dog breed supremacists, should be punched in the face because their hate speech is violence. If we let them discuss the practice of selective breeding, then the Nazis will return and cause another Holocaust, so they must be stopped by any means necessary.

The practice of segregation and selective breeding is a racist practice that has no place in the modern era of tolerance and racial equality. I propose a law, the Anti-fascist Dog Breed Melting Pot Act to end this racist practice which has its roots in eugenics and evil Nazi ideology.

All dogs are to live together at kennels and breeding facilities. Yes, at first they will fight each other and many will die, but that is just a part of living in a multicultural society, get used to it! Every dog has the right to live with other dogs of all breeds and to mate with them. Eventually they will all homogenize into one generic breed and then will live peacefully forever. This will be justice for thousands of years of pit bull aggression.”

This would be ridiculous and stupid right? People purposely have bred dogs to be different and we value their differences. This act would essentially be genocide against all the different breeds of dogs.

“But people aren’t the same as dogs, you racist Nazi!”

Of course they aren't, but nevertheless we, like every animal on Earth have differences that evolve when populations develop independently over time. This is a historical fact that cannot be changed unless we genetically engineer designer babies. That brings up a good point, if you could genetically engineer all the people of the Earth, would you want different and unique peoples or would you just throw all the genes in a randomly mixed blender and see what came out?

Human beings evolved in groups which are like extended families, this is how culture evolved. By creating liberal melting pot societies we are committing the ultimate form of racism, genocide.

People understood this throughout history, it is common sense and until very recently it was codified into the immigration laws of most countries. America did not allow widespread immigration of different ethnicities until the Immigration and Nationality Act of 1965.

The American people were misled about the long term effects of The Immigration and Nationality Act of 1965;

"This bill that we will sign today is not a revolutionary bill. It does not affect the lives of millions," Johnson said at the signing ceremony. "It will not reshape the structure of our daily lives or add importantly to either our wealth or our power." - Lyndon B. Johnson

This change of policy has had the following results, in 1960 America was 89% White and by 2015, it was 62% White. The current percentage of White children is 49.8%. The next generation of white Americans are a minority in the country their ancestors fought and died for to create.

What is a nation?

The National in National Randsviscracy stands for one people. The word nation comes from the same root as natal, meaning birth.

Civic Nationalism and Demographic Displacement

In the past, the concepts of the nation and the folk, the people which composed the nation, were fundamentally intertwined. The root of the word nation is the same as natal, meaning birth. The identity of nations is being distorted in the modern area to be that of civic nationalism, a nation is now an "idea" or a magic piece of soil where you can naively bring anyone into and they will somehow assimilate into the group. This worked in the past when the majority of immigrants were of people who were of similar genetics, religion and culture. As time passes, it becomes more and more apparent that to apply this to people who have

fundamentally different identities is both naive and self-destructive. This civic nationalist view of the nation has been promulgated in America by redefining the idea of what America is as being a “nation of immigrants”. Whom does America belong to? Originally it was created by and for Europeans. By changing the definition to be a “nation of immigrants”, America is being redefined to being owned by no one or being owned by everyone in the World. This ambiguity creates a situation wherein ownership is up for grabs. This will of course lead to conflict and is fundamentally unsustainable, as all groups want the right of self-determination which cannot exist when control of the nation is in a state of flux.

“The influx of foreigners must, therefore, tend to produce a heterogeneous compound; to change and corrupt the national spirit; to complicate and confound public opinion; to introduce foreign propensities. In the composition of society, the harmony of the ingredients is all-important, and whatever tends to a discordant intermixture must have an injurious tendency...The United States have already felt the evils of incorporating a large number of foreigners into their national mass; by promoting in different classes different predilections in favor of particular foreign nations, and antipathies against others, it has served very much to divide the community and to distract our councils. It has been often likely to compromise the interests of our own country in favor of another. The permanent effect of such a policy will be, that in times of great public danger there will be always a numerous body of men, of whom there may be just grounds of distrust; the suspicion alone will weaken the strength of the nation, but their force may be actually employed in assisting an invader.” -Alexander Hamilton

In a major Chinese newspaper, called the [IB Business Times](#) there was an article entitled ‘Do the Jews Really Control America?’

“Yes, I think it is obvious that Jews control the western world. They tell you who to wage war on, who to fight, who to support and how to spend your money. This is what we Chinese want to understand when we study Jewish dominance and hegemony of the west.” - Professor Xu Xin.

Xu Xin is a professor at Nanjing University and China's leading Judaic scholar, as well as the founder and director of the Diane and Guilford Glazer Institute for Jewish and Israel Studies at Nanjing University in Nanjing, China.⁶

Professor Xu Xin stated in the recent IB interview;

“There are literally so many instances of how you have fallen for Jewish tricks. Hitler was the last person to openly contest Jewish rule and look how he is viewed. He is hated because of what Jews taught you with their films and books. We Chinese are amused at how gullible White men are. We want to find the same way to shape your thoughts. This is why we study them (Jews).”⁷

⁶ [Xu Xin \(Judaic scholar\) - Wikipedia](#)

⁷ [Chinese Academic Says China Using Jewish Model to Take Over United States & West](#)

This reveals the root of the problem of democracy. It is susceptible to media manipulation due to the popular voting system and it is susceptible to corrupt politicians who can be bought. Have you ever noticed how every president bends over backwards to appease Israel? It may have to do with the [many Israeli lobbying groups](#) which give millions of dollars every year to US politicians. The American Israel Public Affairs Committee (AIPAC) alone gives \$2-3 million in political contributions per year. In exchange, Israel currently get \$38 billion in military aid per year. Not a bad return on investment. "Oy vey" says the American taxpayer.

I do not blame the entire Jewish people for this, anymore than you could blame every citizen of a country for the crimes of their government. I simply want to defend against any damaging influence of my country. I feel the same about Islamic extremists and I am also concerned about political contributions from countries such as Saudi Arabia and Qatar. For example, since 2001, Saudi Arabia, Oman, Qatar and the United Arab Emirates [gave as much as \\$40 million to the Clinton Foundation.](#)

Now you can see my conundrum when thinking of what the ideal government of the future would look like. So I pondered, which form of government? Democracy has obviously been thoroughly hacked. I feel that libertarianism or anarcho-capitalism would be much less susceptible to infiltration and corruption from within but they need a central rule of law for cohesion to withstand outside threats via war and exploitation. National socialism, which, like communism in North Korea or China is almost impenetrable to infiltration and corruption from outside but is susceptible to internal corruption.

I am seeking to create a government form which is as immune as possible from corruption and exploitation yet could still retain the maximum amount of freedom and prosperity. One that would also unite people in national cohesion. The government system I envision (which combines elements of republics, national socialism, propertarianism and sortition, I named national [randviscracy](#)(a national government by random advisors). In coming up with a method of preventing corruption, I independently rediscovered sortition. I had never heard of it, but after searching for governments which involved randomization I found out about sortition. The Athenians had chosen the method of using random appointment for the very same reason. It is an effective way of preventing corruption.⁸

Immigration Policy of the US and the Change of American Demographics

America's first immigration law, the Naturalization Act of 1790, allowed people who had lived in the United States for 2 years and who were "free White persons" of "[good moral character](#)" to become citizens. This is the original immigration policy that the founder of the United States intended. America was essentially an ethnostate. Gradually the immigration laws have been loosened and illegal immigration has been allowed to the point that immigration has

⁸ [Kleroterion – Ensuring a Just Democracy](#)

significantly changed American culture and demographics. In 1960 America was 89% White and by 2010, only 63% White. Currently [more non-White children are born in the America than White children](#). [By 2044 Whites are expected to become a minority in America](#).

In "[Jews and Immigration: Time for Change](#)" Marcus Alethia, Ph.D., who himself is Jewish says;

It is not racist for European people to want to be majorities in their own countries, any more than it is for Asians, Africans, Arabs, or Jews. It is not Hungarian supremacy that makes Hungary close its borders and try to maintain its cultural uniqueness. It is not Jewish supremacy that makes Israelis think a Jewish majority in Israel in the midst of an overwhelmingly Arab Middle East is necessary and reasonable. And it is not White supremacy that makes White Americans wish to preserve a basic, White majority, which implies no ill-treatment or legal second-class status for Americans of color.

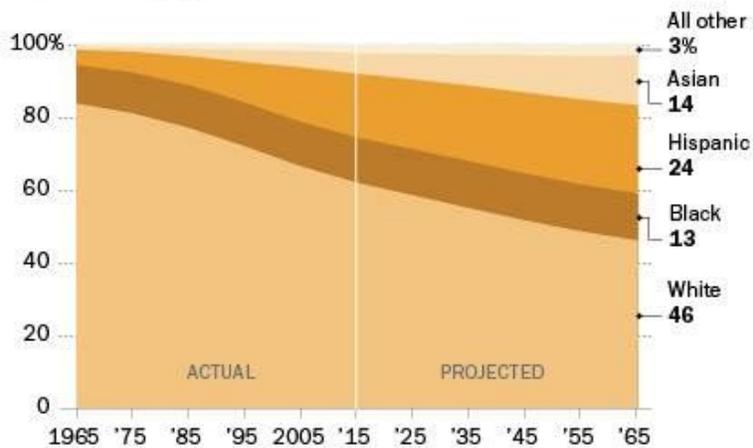

All Jews know open borders would be a disaster for Israel. It is equally a disaster for everybody else."

Why are only White cultures being pressured to become more diverse? China, the Middle East and many parts of Africa are not diverse and there is no talk in the media of the lack of diversity in these areas. This reveals that it is not a universal principle but rather a method being used to destabilize Western nations.

At current immigration rates, whites will be a minority in America within 20 years

The changing face of America, 1965–2065

% of the total population

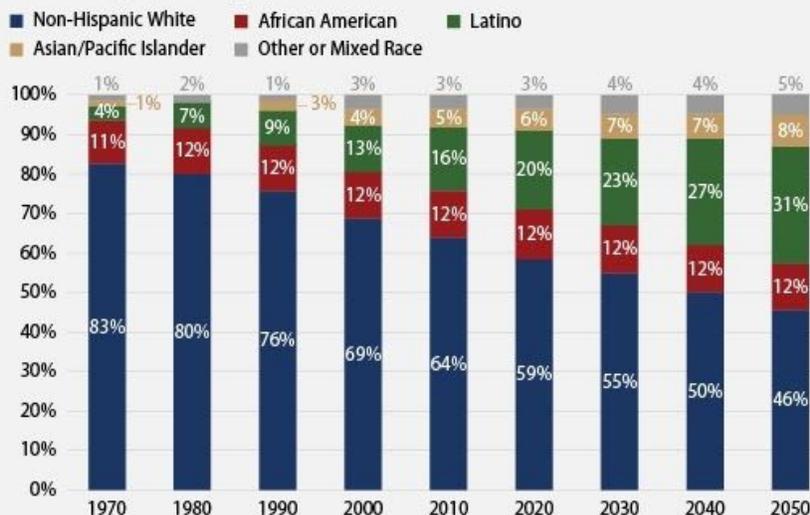

Note: Whites, blacks and Asians include only single-race non-Hispanics; Asians include Pacific Islanders. Hispanics can be of any race.

PEW RESEARCH CENTER

U.S. changing demographics, 1970–2050

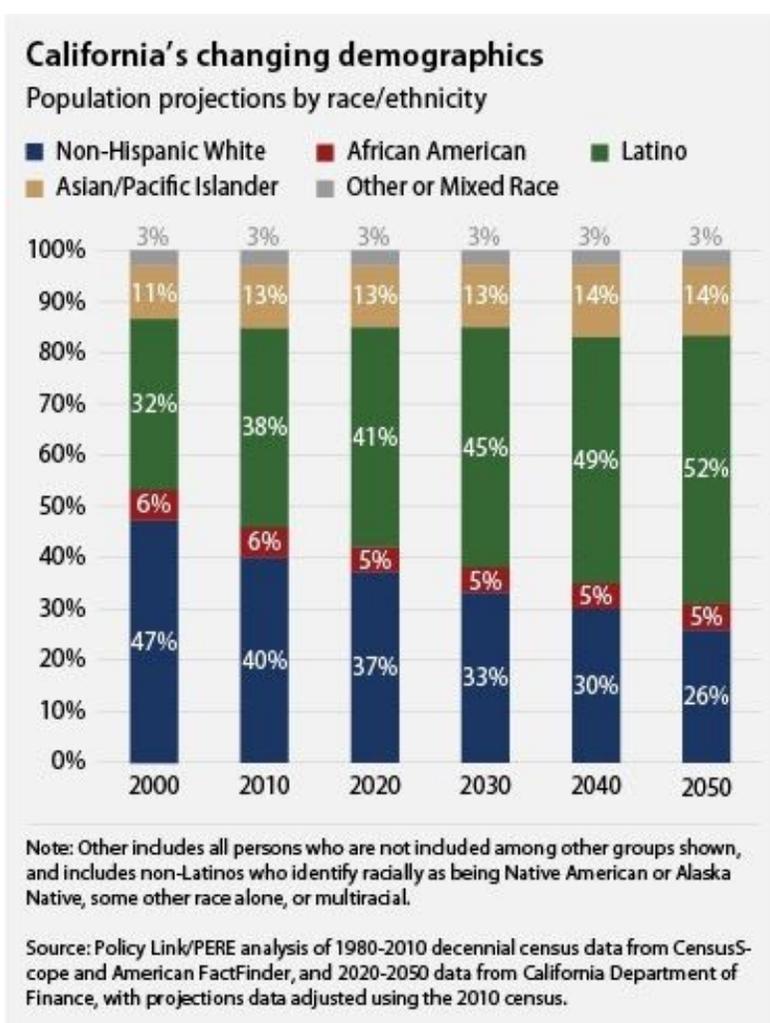

Note: Other includes all persons who are not included among other groups shown, and includes non-Latinos who identify racially as being Native American or Alaska Native, some other race alone, or multiracial.

Source: PolicyLink/PERE analysis of Statistical Abstract of the United States (1970 and 1980); U.S. Census Bureau, decennial censuses (1990 STF3, 2000 SF3, and 2010 SF1); U.S. Census Bureau Population Projections, 2008 (2020-2050), adjusted using the results of the 2010 Census.

The United States' hispanic population in 1950 was 4 million. By 2018 it had grown to 68 million.

At current immigration levels and birth rates, it is expected that in 20-30 years Whites will be a minority in America and soon after in Europe as well. In 2019 alone, over 1 million illegal immigrants entered the US.

Donald Trump has stated that he wants “people to come in the largest numbers ever, but they have to come in legally.” This is the civic nationalist mindset that naively is blind to the long term political consequences of demographic displacement, which history is clear on the devastating effects of. Compare Detroit to Hiroshima. You can recover from even a nuclear bomb, but you cannot recover from the displacement of the founding population.

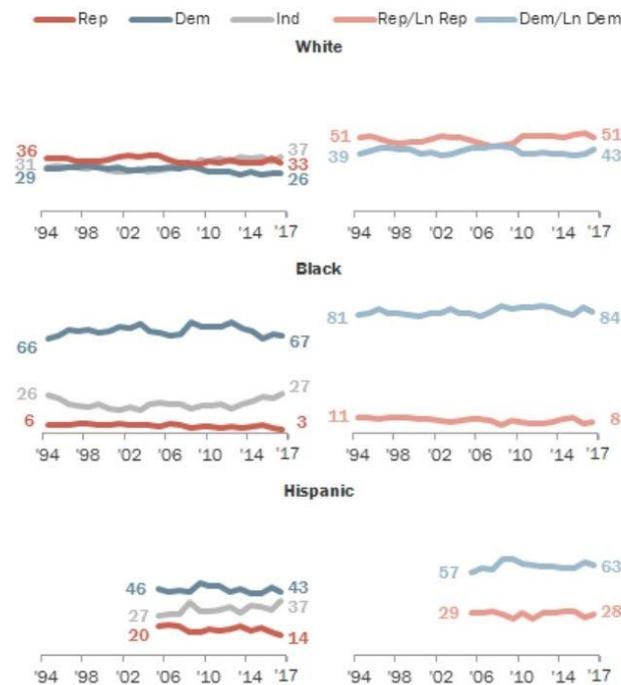

California and Texas are examples of demographic displacement. Just a few decades ago, California was over 80% white and reliably voted Republican/Conservative, once the demographics of the state had changed though it forever changed politically as well.

Black, Hispanic and Asian voters remain overwhelmingly Democratic

Continuing racial and ethnic divisions in leaned partisan identification

% of registered voters who identify as...

PEW RESEARCH CENTER

Soon, Republicans will be unable to win a national election due to Demographic shift. Texas will soon turn Blue, just like California did. Never to return. If you know a civic nationalist, who thinks that all people are just interchangeable economic units, ask them “what is the chance of California becoming a Republican stronghold again?” What do they think was the cause? Could it have anything to do with the millions of illegal immigrants that Ronald Reagan granted amnesty? Is there any case of a state reversing this?

Minorities vote left wing at a rate of 2-to-1 over whites. This has been the case for decades, despite the Republicans attempts as swaying minority voters. One note is that it is white hispanics who vote right wing and this throws off the numbers for hispanic votes. If only non-white hispanics were counted, the percentage voting left would be much higher.

Two more factors compounding the demographic problem of the United States are 1. race mixing, which has

been heavily promoted by media in advertisements, TV and movies by showing mixed couples constantly. The percentage of mixed race children born each year has increased over 300% in the last 35 years and has doubled in the last decade alone.

2. Declining birth rate, the result of women being encouraged to enter the workforce rather than raising families, feminism and the destruction of the family unit and the importance of marriage. Women have been encouraged since the 1960’s to seek careers and the image of the homemaker is mocked and ridiculed deliberately in media/cinema. By influencing women to choose careers over motherhood, the state effectively doubles the number of taxpayers. The very important work that mothers/homemakers provide is untaxed. Now they can tax the man and woman’s wages, along with the housekeeper’s and the daycare center.

In the documentary “[WHITE GENOCIDE IS REAL - IN THEIR OWN WORDS](#)” you can see numerous people in leadership discussing continued plans of increasing immigration and the “inevitability” of white people becoming a minority in their own countries. Former Vice President of the United States, Joe Biden says in the video;

“The wave continues, it is not going to stop. Nor should we want it to stop. An unrelenting stream of immigration, non-stop. Folks like me of European, Caucasian descent will be an absolute minority in the United States of America. From 2017, then and on less than 50% of Americans will be of European stock. That is not a bad thing. That is the source of our strength.”

In a separate interview Joe Biden contradicts himself by saying;

“There is this inextricable tie between culture, religion, ethnicity, that most people don’t fully understand, that is unique and so strong with Jews worldwide...I used to say when I was young, when I was a senator that if I was a Jew I would be a Zionist. Well, I am a Zionist. You don’t have to be a Jew to be a Zionist.”⁹

So when it comes to European-Americans, becoming a multicultural displaced minority is a good thing, but in the case of Jews, Biden praises their cohesiveness.

The UN uses declining birth rates in Western Countries to sell it’s [Replacement Immigration Policy](#)(I had to update the link to an archive because the original was removed). It is using these numbers to fool the leaders of countries into destroying their own cultures. The European Union(EU)’s predecessor, the Pan-European Union, was founded by Coudenhove-Kalergi who wrote a book called “Practical Idealism” in which he states;

“The man of the distant future will be hybrid. Today's races and the boxes are increasing [22] the overcoming of space, time and Prejudice fall victim. The Eurasian- Negroid Future race, externally similar to the ancient Egyptian, the diversity of peoples will Replace diversity of personalities.”(rough translation from German)¹⁰

⁹ [WHITE GENOCIDE IS REAL - IN THEIR OWN WORDS](#)

¹⁰ [Coudenhove-Kalerg Practical Idealism English Translation](#)

Attractive and repulsive forces of migration

Below I will list influences which attract or repulse migration. Currently the powers that *were* are using forces of attraction in an attempt to break up the homogeneous populations of western nations.

These forces work both ways. The forces which attract can be reversed to repel.

<u>Attract</u>	<u>Repel</u>
Economic	
Employment and business opportunity(markets)	Restriction or barring of employment and business opportunity. Businesses must be owned by and employ only natives.
Welfare/stipends	Barring eligibility for welfare to migrants. Must be self sufficient. Compensation can be made for emigration to encourage it.
Government services/healthcare	Restricting use of government services to natives
Social	
Acceptance of foreign customs	Hostility to foreign customs
Population's tolerance/acceptance of foreign population	Population hostile to foreign population
Low levels criminality or predation	High levels of criminality or predation
Safety/state of peace	Dangerous/state of war
Language (use of migrants native language common)	Outlawing of foreign language use in publications or government correspondence

Mating opportunity	Outlawing of relations with foreigners or causing loss of citizenship
High trust commons	Low trust commons
Legal	
Open immigration laws	Restrictive/selective immigration
Religion legal to practice	Foreign religion restrictions
Customs are legal	Outlawing of foreign customs
Physical	
Lack of barriers	Fences, walls, traps, military patrols, monitoring for and intercepting migrants
Traversable terrain	Rough terrain – mountains, rivers, oceans

The attractive forces column above shows why immigration pressure exists on Western nations. The people of these nations have built high trust, low crime commons. In addition they have had their immigration policies pushed toward immigration friendly practices and lenient/lax enforcement of immigration law, with some cities and states in the US even ignoring immigration law and undermining federal immigration enforcement officers.

Western media and educational institutions have been used to indoctrinate the population to tolerate mass immigration and to dissolve western culture into a conglomerate globalist, consumerist anti-culture. The natural protective instinct has been labelled as xenophobic and racist, as a way to label and ostracize any who would oppose their own people’s displacement.

You can read about the policy of deliberately introducing migrants into areas of America that were deemed to be “too white” in the book [“The Way Life Should Be?”](#)

Israel: Ethnostate and the Hypocrisy of Pro-immigrant Jewish Politics

Israel is an ethnostate, which is defined as “a political unit that is populated by and run in the interest of an ethnic group.”¹¹ I don’t think anyone would doubt the importance of protecting one’s race and culture to Israelis. But when it comes to European/White countries, Jews have historically, by and large promoted the opposite, the reason being (whether intentional or instinctive does not matter) is that a unified people is a strong people. A unified immune system which can detect foreign invaders leads to a healthy body. Autoimmune diseases confuse the body’s own immune system into attacking healthy cells rather than the disease. This is what we are seeing with liberal brainwashing that has turned white liberals into being the only group which has an outgroup preference.¹² They have been conditioned to believe that whiteness is a problem and therefore they must sacrifice their nations on the altar of multiculturalism in the name of social justice.

Diaspora Jews, themselves being an outgroup, naturally have a motivation in promoting a tolerant, “open society” to non-Jews. An example of this is a group funded by George Soros named the Open Society Foundation which promotes mass immigration in white countries. Paradoxically, Jews are a classic example of why multiculturalism cannot work when groups are culturally and genetically distant. This in-group preference which strengthens their own solidarity poses a problem when it exists in a host population. The Jewish religion and customs oppose integration and therefore have maintained their distinct identity despite living thousands of years as a minority in host countries all over the World. Therefore diaspora Jews are in a state of perpetual hypocrisy in promoting multiculturalism for others but promoting in-group preference for Jews.

Multiculturalism is cultural dilution and the end result is cultural destruction. Culture itself is an outgrowth of the cohesion of racial groups, so the disintegration of the group cohesion results in the disintegration of the culture itself as it is diluted. Barbara Spectre of the Paideia Institute of Jewish Studies in Sweden stated that Europe’s multicultural enrichment “must take place, Europe is not going to be the monolithic culture that it was in the last century... Jews are going to be at the center of that.”¹³

The Paideia institute was initially funded by blackmailing the Swedish government out of 4 million dollars by accusing the Swedish banks of having confiscated Jewish gold from the

¹¹ [ethnostate - Wiktionary](#)

¹² [America’s White Saviors](#)

¹³ [Jewish Power \(25 minutes in\)](#)

Nazi's. There were 2 [investigations by the Swedish authorities](#) that found no evidence of this. The group then told the Swedish authorities that if they did not pay up, they would get the World Jewish Congress to label the Swedish government as anti-semitic.¹⁴

An internet search for pro-immigration or pro-refugee jewish groups will show many groups around the World promoting immigration into european people's countries, but if you look at the policies of Israel, they are ethnicity based and limit entry to non-Jews; "The admission of non-Jewish refugees who do not qualify under the Law of Return, however, has traditionally been very limited." [Library of Congress](#)¹⁵

If Jews want to promote immigration, they should move to Israel and see how far they get trying to promote mass immigration there. It would rightly be rejected as being suicidal to their country.

A better solution to refugee problems are local safe zones where many more people can be helped, rather than the [permanent relocation](#) proposed by these refugee groups such as HIAS. The group HIAS (Hebrew Immigrant Aid Society) opposes Trump's travel ban but "Iran, Libya, Yemen, Syria and Sudan – which make up five of the six countries included in Trump's revised ban - all block the entry of Israeli passport holders into their countries. A policy upheld by 16 countries in total, all but one of which are Arab League nations, who doesn't officially recognize the state of Israel and actively choose to boycott it."¹⁶

[The US government actively promotes and funds the displacement of Whites.](#) Refugee groups like HIAS are given millions in government funding, diversity is promoted in colleges and workplaces via government grants and diversity laws.¹⁷ There are whole companies that make money by forcing corporations to sell diversity classes or they will accuse them of being racist. It is a [multi-billion dollar industry](#).

Race mixing and displacement – the destroyers of civilizations

In a study on the history of civilizations, there is a recurring theme in the collapse of civilizations. As to the cause, it cannot be explained simply by military defeat. For example, the Celts sacked Rome and they eventually came back and conquered the Celts. Germany was thoroughly destroyed after WW2 and 20 years later they had an economic export level that rivaled America's and was greater than any in Europe.

¹⁴ [SWEDEN: BARBARA SPECTRE & PAIDEIA – JEWS BlackMAILED SWEDISH GOVERNMENT FOR FUNDS](#)

¹⁵ [Refugee Law and Policy: Israel](#)

¹⁶ [If you thought Trump's travel ban was controversial, take a look at some of these immigration bans](#)

¹⁷ [The War Against Whites Is Massively Incentivized](#)

“Most importantly, revealed in this work is the one true cause of the rise and fall of the world’s greatest empires – that all civilizations rise and fall according to their racial homogeneity and nothing else—a nation can survive wars, defeats, natural catastrophes, but not racial dissolution.” -Arthur Kemp, [“March of the Titans”](#)

It is pretty simple, “if the people that created a civilization disappears, then the culture and civilization of that founding people disappears with it.” - Arthur Kemp

The author of “March of the Titans” , Arthur Kemp states the main cause of the changes in the racial homogeneity of civilizations,

“in almost every case that I can think of, it is simple ignorance of the long term consequences of using foreign labor... if you could go back in time to a plantation owner in Georgia in the 1800’s, put him in the time machine and bring him to 2016 and drop him in the middle of Atlanta, Georgia and say “Look here. As a direct consequence of you and a small group of plantation owners using Black labor, it is now unsafe for your great-grandchildren to walk the streets of the capital of your state of Georgia because it has been taken over by Blacks and it is now unsafe for White people to walk the streets. I am quite sure that plantation owner would never have dreamed, never wanted in his wildest imagining, never wanted that for his grandchildren. But he didn’t understand the long term consequences of using foreign labor.

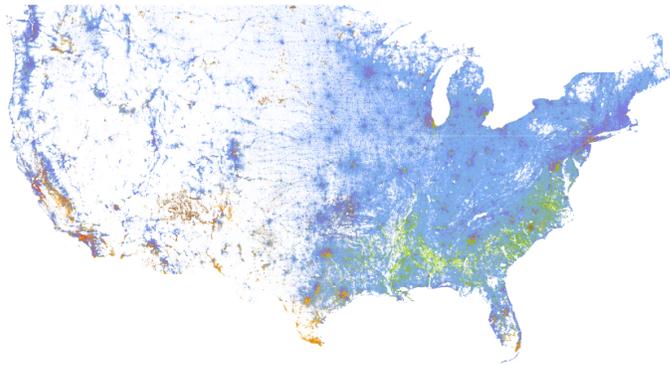

I think this played out in Egypt, this played out in Sumeria, this played out in every great civilization that has fallen. Or in South Africa, or in Rhodesia...It’s easy to blame others and certainly others do have a role to play, I am not denying that, but I’m afraid that the truth which hurts is that it is quite often White people themselves who don’t have an understanding of the global, geopolitical, racial consequences of their actions.”

18

People naturally self-segregate

[The following map](#) of ethnic demographics in America clearly shows how that people naturally self-segregate. You clearly see self-segregation.

The existence of culture itself is due to self-segregation. Cultures rose up out of the uniqueness of different peoples and their adaptation to their environment over millennia. This is something to be cherished and protected, not ashamed of or destroyed.

2010 Census Block Data

1 Dot = 1 Person

What am I looking at...?

Race mixing does not end discrimination

Biracial people are compelled to choose a race to identify with. This shows the very fundamental basis of race. You cannot opt-out. It is who you are and your history. It affects your behavior, your IQ level and almost every aspect of life. This is also not a matter of one race being superior or inferior to another, each race has strengths and weaknesses and there are population distributions, so that people span the range of abilities and intelligence. Nevertheless, people will always identify with their race, it is built into our very nature. Studies have shown that when shown pictures of strangers, they instinctively trust people of their own kind more. Racial bias is also known as in-group bias. It is a natural evolutionary protection system. It appears to be learned during infancy by the faces an infant sees caring for them. [A study showed](#) no bias in infants less than 6 months but showed bias after 7 months. [Another study on adults](#) showed that people who do not report being explicitly racist had trust bias in testing. The test also showed that the mental process triggering the bias occurred at even the subconscious levels.

This demonstrates that bias would serve a valid purpose for thousands of years in the past in the age of conquest. Imagine if a foreign group was migrating into your tribe's territory, it would be very valuable to be able to detect a member of another group instantly upon contact. A child could also instinctively know who to trust, who was a member or family or tribe, ie their extended family.

In the case of biracial children, if they are in a single parent household, they will develop racial bias favoring the face which they see more while they are an infant.

What is nationalism?

The National in National Randviscracy stands for one ethnic state, as the founders of the United States intended. I will show why this is a crucial component of having a harmonious state in which people coexist peacefully. People naturally segregate and that is how their cultures arise. To destroy the demographics of the people is to destroy the culture. America itself is or rather **was** (up until the 1965 Immigration Act) a product of the natural evolution of the Western European race. The founders who fought in the Revolutionary war and wrote the Constitution were overwhelmingly of Western European ancestry.

“Providence has been pleased to give this one connected country, to one united people; a people descended from the same ancestors, speaking the same language, professing the same religion, attached to the same principles of government, very similar in their manners and customs, and who, by their joint counsels, arms and efforts, fighting side by side throughout a long and bloody war, have nobly established their general Liberty and Independence.” -John Jay

The very ideal of an ethnostate is taboo to people in Western countries in the modern era, but historically it was common sense. We have been systematically conditioned to believe in the liberal principle of egalitarianism, to ignore the reality that is all around us and the evidence which spans the entire history of the human race. Everyone knows that people are different. Not superior and inferior, but different, each having different strengths and weaknesses. Cultural Marxism has conditioned people to find virtue in denying reality.

The Nation

The word nation comes from the same root as the word natal, meaning birth. Just as how animals form packs, human families form tribes > communities > nations.

A united people is very hard to infiltrate and exploit and they know that. That is why nationalism and fascism are so demonized and also why divide and conquer is such a frequently used tactic. Anyone who supports an ethnocentric state is labeled racist, except for Zionists in the case of Israel.

I propose America be split into new states consisting of Europeans, one for descendents of African slaves and one for descendents of Native Americans. With the condition that enough of each group assists in the creation thereof and do not

PHILIA

Aristotelian concept signifying 'friendship' — ethno-cultural consensus between members of the same City.

For Aristotle, democracy is possible only within homogeneous ethnic groups, while despots have always reigned over highly fragmented societies.

A multi-ethnic society is thus necessarily anti-democratic and chaotic, for it lacks *philia*, this profound, flesh-and-blood fraternity of citizens. Tyrants and despots divide and rule, they want the City divided by ethnic rivalries. The **indispensable condition for ensuring**

fight against its creation. In other words hostile elements are not eligible.

The size of each country will be based on the percentage of current US citizens who agree to form their own new country voluntarily. People who fight against the new government would be outlaws and not considered part of the new ethnostates. This would incentivize a peaceful transition to the new states.

People who do not want to move to their new ethnostate can stay but will no longer be citizens of that country, cannot own land nor financial or media companies and must pass the "good moral character" requirement of the Naturalization Act of 1790. They will be considered guests in the country and if they violate the good moral character requirement, their guest status will be revoked. Citizens who violate the law will face criminal and/or civil penalization rather than deportation.

To prevent future conflict, criminal deportation and guest entry systems would be shared between the new countries as a requirement upon creation. It is best to get these established at the onset. The countries would all have to adopt Randviscracy as their government system, it would not be in the best interest of each country to have competing forms of government which could be co-opted by foreign governments and used against their neighbors. The countries would also be united in mutual commerce and military defense agreements established at their creations. The agreed upon mutual defense would also include assistance in the event of revolutions, again to prevent foreign influenced coups. By all of the new ethnostates having the same form of government, implemented at the same time, they would have good relations. Mistreatment of non-citizens would be universally prohibited.

Propertarianism

Guide for Panel Members

Panel members carry the primary function of the government by making decisions/judgements. They are the finders of the truth and the deciders of what course of action is in the interest of the Nation. They should be educated in a scientific method of deciding the law. Great work in this field of applying the scientific method to law and codifying what the Western European tradition of civilization building and strategy has been done by Curt Doolittle and the Propertarian Institute.¹⁹ They have created a language of terms (grammar) to define the natural law of Western Civilization's practices, epistemology (theory of knowledge) and group evolutionary strategy (truth over face). Propertarianism is "the science of truthful, reciprocal, operational speech".²⁰

I propose that all panel members first undergo a course of [Propertarian law](#) to aid in understanding reciprocity, property-in-toto and operational language (testimony). A framework to avoid errors in thinking and documenting. They must then write their judgments in operational language.

Reciprocity

Panel members are to seek reciprocity (or the restoration thereof) in negotiations, deciding of fault, fines and other decisions. This is to aid in the goal of one of the primary purposes of government, the prevention of retaliation cycles. Curt Doolittle defines reciprocity as "productive, fully informed, warrantied, voluntary exchange, free of imposition upon the demonstrated interests (investments) of others."²¹

¹⁹ propertarianism.com

²⁰ [What is Propertarianism?](#)

²¹ [No. "Libertarians" Do NOT Use Reciprocity](#)

Property-in-toto (in total)

Panel members should understand the concept of property-in-toto and seek to protect both public and private property (see previous section on page 56). This is the point on which libertarianism fails. It does not value or protect the commons which a nation builds over generations with blood and sweat. Common property is defined by the protective rules of a society. Ownership of this property is codified by defining who a citizen is.

Decidability

Panel members must state whether their decision is decidable or discretionary. In other words, is there enough evidence and understanding of the evidence to be certain?

Decidability: A Demand For Decidability in Display Word and Deed:

a) In the REVERSE: a question (statement) is DECIDABLE if an algorithm (set of operations) exists within the limits of the system (rules, axioms, theories) that can produce a decision (choice). In other words, if sufficient information for the decision is present (ie: is decidable) within the system (ie: grammar).

b) In the OBVERSE: Instead, we should determine if there is a means of choosing without the need for additional information supplied from outside the system (ie: not discretionary).

Or in simple terms, if DISCRETION is necessary the question is undecidable, and if discretion is unnecessary, a proposition is decidable. This separates reason (or calculation in the wider sense) from computation (algorithm).²²

Operational Language (testimony)

Operational language works like computer programming statements. It is written in full sentences, consisting of actions and uses ePrime, which means no use of the verb to-be (is, are, was, were). Each statement is clearly defined in a way that eliminates ambiguity and the ability to deceive. An operational statement contains the proof of the statement within it. Here is the outline of what the parts of an operational statement would be composed of.

-We ... (who)

-Whereas we have observed ... (definition of state)

²² [What is Propertarianiam?](#)

- Whereas we desire ... (definition of desired state)
- We propose (series of actions to change state)
- and we argue (how the desired state, the propositions, do not violate the one law of reciprocity.)
- Even though this argument is dependent upon ... (prior laws)
- and would be reversed if (prior laws were falsified, or conditions had changed),
- And we warrant this argument by (skin in the game).
- Signed
- -Juried
- -Adjudicated.
- -Recorded.
- from "[Natural Law, and the Grammar of Operational Language](#)" by Curt Doolittle

Testimony is like reporting in the military. In the military you are responsible that information you report is as accurate as you can convey (you have performed due diligence), is warranted by you and you are responsible for the ramifications if there are errors in your report.

Testimonial prose allows us to determine whether a person who is claiming something is reciprocal (truthful and right, ethical, moral, or good) can make the claim by demonstrating sufficient knowledge to make the claim, and has made the claim.

And that is the purpose of Testimony: to create A System of Measurement: A Value Neutral Language for the discussion of Reality (what we call metaphysics), physical sciences and the human sciences of psychology, sociology, economics, ethics, law, politics, and group strategy.²³

²³ [What is Propertarianiam?](#)

What makes a good government? What is the purpose of government?

Protection of property, both physical and intrinsic

The purpose of a government includes, protecting the citizens from external and internal threats. To maximize the conditions for prosperity and to minimize impediments. This not only applies to physical property in the libertarian non-aggression principle sense(NAP), this also applies to the commons, which consists of cultural norms, the foundation of social trust. A definition of this “property-in-toto”(total) from the Propertarian Institute.

From “[Property In Toto](#)” by Allen Freeman;

“For thousands of years of human history, private property, whether private goods, resources, or land, were the primary cause for most all wars and violent interactions between men. Throughout these wars and interactions, men discovered that there were many different classes and forms of property which they were willing to defend. Property-in-Toto is a catchall term which comprises all of the many forms of property which were and are of concern to men. Everything which falls under the umbrella of Property-in-Toto shares one trait: Men are willing to use violence to keep others from stealing, destroying, or causing harm to it.

There are many forms of simple property, from the rock a man picks up, to the spear he made with his own two hands. These were, in most cultures, nearly beyond dispute.

There was land, which was easy to claim, but was harder to defend or show claim to if it was vast acreage.

There was communal property, which might come in the form of a well, a shrine or religious building or location, or communal village land.

There were also more complicated cases of property like parents and children, and husbands and wives, and a man owning himself, where one would definitely use violence to defend what he felt was his, but those defended also had their own free will. Another class of property all its own is that of Intangible property. Intangible property exists inside the realms of both personal and group property. Intangible property exists in ideas or information which men are willing to defend, such as a man’s reputation, or the reputation of a man’s family or ancestors. These things may not be tangible in such that you can point at or identify them, but they exist as property because men are willing to defend them with violence, oftentimes even more so than the more tangible types of property.”

In order to prevent abuse of the property-in-toto concept, I propose that common property be defined in the initial constitution and limits placed on its expansion, as a guide of the scope of property rights.

First Principals of Government:

Government is the monopoly of force. The referee who arranges the laws and enforces them. So the question is, how to organize it to meet a goal? What are the goals?

1. Survival of a people,
2. Prosperity of a people.

The first step is to define who the people are. This is one thing the founders of America unfortunately took for granted when making the Constitution. They assumed that it was so obvious that they couldn't imagine a day when people would forget or be deceived into forgetting who the owners of the nation are.

The founders also left the door open to amendments which have been used to change America from a Republic of Western Europeans into a full franchise democracy where ownership and thus control are undefined and open to anyone who hops across the border and has a baby or gets amnesty. This is opening the gates to conquest. It is a recipe for conflict. The founders of America knew this and warned against the problem of having a heterogeneous population.

In this chapter I will list what policies could maximize the 2 primary goals of a government, survival and prosperity of its people.

How to maximize survival?

1. Reduce violence, retaliation cycles.
 - a. Police and security force which protects from acts of non-self-defence violence and a legal system which punishes the offenders.
 - b. Court system which fairly handles disputes.
 - c. Armed citizenry who can defend themselves.
 - d. Community protection groups which defend from and report acts of violence.
2. Protect from foreign armies.
 - a. A military and militia which exceeds the threats posed by hostile political forces.
 - b. The military also has power to punish forces which seek to harm the Nation.
 - c. Intelligence system which can identify threats.
 - d. Political influence and a system to impose it to dissuade potential threats.
3. Protect from disease and sickness.
 - a. Immigration/entry system which screens for the introduction of disease.
 - b. Removal of patent system for medicine to ensure maximum availability.
 - c. Prevention of artificial inflation of the price of medical care via barriers to entry. Allow a full market of low quality/low price to high quality/high price. Ensure no

fraudulent claims in treatments or poisonous ingredients. Let the legal system ensure the Hippocratic Oath of “first do no harm”. Prevent a certification/certified college system or accreditation institute from gaining monopoly or creating a barrier to entry.

- d. Have a system in place to counteract the spread/outbreaks of disease. Especially in public transport. Forbid the contagious from using public transport. Forbid the contagious from public buildings, schools and workplaces.
 - e. Require hygiene and basic health education in schools. Continually updated with current best practices.
 - f. Open access to non addictive, non-psychoactive and non-resistant pathogen forming medicine.
 - g. Prevent/punish restrictive regulation creation which hampers medicine, treatment and health technology.
4. Protect from starvation.
 - a. Prevent food shortages in the case of famines by aiding farmers in times of drought or poor weather conditions.
 - b. Protect from market manipulations of food supply. Outlaw deliberate destruction of food and the manipulation of food markets.
 - c. Food subsidy for the old and the debilitated.
 5. Protect from exposure to elements.
 - a. Heating subsidy for the old and the debilitated.
 - b. Elimination of unnecessary home building permits and fees to make home building less costly and allow people in need to build their own homes (at their own risk). Let the courts protect from and punish fraudulent or deceptive home builders rather than driving up the costs with excessive inspections and fees. Minimize or eliminate property taxes to keep housing affordable.
 6. Protect from natural disasters.
 - a. Create emergency response systems for aiding people in times of emergency. Allow private companies to also offer emergency services.
 - b. Create a national system of analyzing risks of and proposing solutions to minimize environmental disasters.
 7. Protect from planetary extinction events.
 - a. Offer subsidies to companies which aid in space colonization.
 - b. 20 year tax amnesty for space-related business activity.
 - c. Fund research into methods of diverting planetary impacts from meteoroids.
 - d. Reinforce the power grid to minimize outages in the case of solar flare events.
 8. Protect from health damaging pollution
 - a. Allow lawsuits for the damage of health and property from environmental pollution. To prevent abuse, there must be evidence directly supporting 1. the release of pollutant. 2. the health effects are caused by the pollution at the measured atmospheric/environmental levels and 3. the actual costs imposed. Loser pays the legal costs of the other party and the government.

- b. Study costs of and apply fees for the imposition of costs via environmental pollution.

How to maximize prosperity?

1. Minimize transaction costs (reduce predations).
 - a. Protect from theft, fraud, deceit (misdirection or withholding information), extortion, rent seeking, corruption.
2. Protect the labor market from undercutting via immigration and outsourcing. Only allow when the market cannot fill need and only until the local market can meet the need. When using foreign labor to meet demand, seek/provide internal investment to produce a market to fulfill the need.
3. Remove hindrances to investment. The following should be kept to the minimum that is necessary.
 - a. business taxes - under the “balanced tax system” in a later section the businesses are only taxed to the amount to cover the national militia and government salaries.
 - b. fees and permits - set to minimum to cover costs
 - c. regulation - most regulations should be eliminated and handled by the court system instead. People can sue for negligence or deceit and the courts decide which creates precedence to discourage future infractions.
 - d. liability - with a court system set up to prevent abuse and requiring the loser to pay legal fees, liability costs will be minimized.
4. Remove unnecessary regulations, restrictions and fees to businesses (see above).
5. Provide a source of minimal interest loans in which the interest gained is recycled back into the national commons.
 - a. Nationalize banks and set interests to minimum to cover costs.
6. Protect intellectual property from foreign theft. Do not allow foreign entities to copy and then undercut the national market.
 - a. Ban companies from importation that violate. Put duties on countries after repeated and willful violations.
7. Prevent restriction of inventions from reaching the market. Remove patent laws and instead rely on courts to protect from fraudulent copying of products.
8. Promote reproductive growth and eugenics.
 - a. Subsidize high IQ reproduction.
 - b. Restrict low IQ immigration.
9. Promote meritocracy. Government shall use a system of anonymized selection for hiring and for scholarships based on merit to prevent nepotism and gatekeeping.
 - a. Educate those with the ability in the fields which will add to prosperity (primarily STEM but also could be legal and military).
10. Reduce harmful drug use.

- a. Restrict entry of harmful drugs into the country and the production via harsh penalty.
 - b. Legalize the less harmful so as to prevent a black market with no standardization.
 11. Ensure a fair market in old age care so that wealth may be passed down to the next generation rather than absorbed by exorbitant care and medical expenses (ie the current American way).
 12. Protect environmental damage from causing external imposition of costs.
 - a. Companies must compensate for and would therefore seek to limit environmental damage.
 - b. Only companies owned by citizens can extract resources from national territory.
 13. Remove impediments to the flow of information/communication. All forms of communication that do not violate the law, cannot be restricted. Internet access to be granted the rights, protections and provisions of a utility.
-

Defining and Enforcing Law

A just system of government emphasises rule of law as opposed to rule of man (discretionary rule). Rule of law increases trust, decreases opportunity costs, decreases corruption and prevents retaliation cycles. It is the foundation of a prosperous nation. Over the long term, rule of law also creates a eugenic effect as criminals are culled from the gene pool.

Rule of man on the other hand is susceptible to corruption and abuses which will in turn decrease trust, increase opportunity costs (bribes and extortion increases), is prone to injustice and therefore retaliation cycles. Can also lead to dysgenics as criminals may rise in power via a corrupt system of law enforcement.

There are many aspects to how a government could protect its people and their commons and how it could achieve this. You could maximize the protection of individual freedom ie liberty. But where does protecting individual freedom open up the possibility of exploitation or infiltration of this government? This is where a balance must be weighed. Yes, maximizing individual freedom seems to be the ideal, but if you do so without checks, you are opening up the possibility of infiltration from external sources and manipulation via media, outside forces could set up media operations and pay media operations to foment discord and pit groups of people against each other. You also open up the door to economic exploitation, outside forces could dominate the local economies. Thus the NAP is insufficient in protecting the commons of a culture and its institutions. Another example is that corporations could lobby to bring in cheap labor which drives down wages and increases the number of consumers and at the same time driving up land and housing costs in addition to displacing the lower classes from their neighborhoods.

I refer you to work on this done by the [Propertarian Institute](#) and their critique of libertarianism and the non-aggression principle (NAP).

It is a difficult question to balance where rights end and protection begins. This is especially true coming after an age where Jewish nepotism (also Freemasonic nepotism by proxy) and bribery of government officials have created an unfair system via corruption of government officials for such a long period of time. Because of this I propose that there must be a transitional policy to act as a “reset button” in order to restore the natural order.

I propose a form of government that incorporates the idea of sortition(government by lot ie random selection) to create a system that is immunized against bribery and corruption, while allowing the most freedom.

The Carrot and the Stick. Diffusing the Powderkeg

Multiculturalism and the betrayal of Europe and Western Countries' governments to foreign and Jewish interests is not a secret. The percentage of people who know this is growing at an exponential rate. This awakening will continue despite the efforts of the pressure applied by Jewish groups and their proxies like the ADL on social media. Even if the current attack on free speech is continued, the inevitable decay caused by the destructive policies being instituted are becoming obvious to all but the most unthinking people. The multicultural agenda is causing societal breakdowns and the ensuing chaos will be ripe ground for political evolution.

There will be no repeat of World War 2. The next war will truly be a World-changing event with the end of the Jewish/Anglo world empire. If World Jewry pushes the Nations of the World down this path of destruction, and it causes another World War, they have run out of allies. I propose a solution, a diffusing of this powderkeg. The solution being;

1. Israel and its people become a nation like any other people in Israel, while disavowing the meddling of internal affairs of foreign states via the [Sayanim](#). It would be good for Jews have a homeland and no longer act as an international quasi-state. Unfortunately, the state of Israel is currently a Rothschild-backed criminal base and I encourage them to overthrow their parasitic ruling class. I acknowledge that the diasporic nepotism had a crucial role in the protection of a stateless people but with the foundation of the state of Israel, this is no longer necessary and in the long term does more harm than good if it brings with it the animosity of other countries. It is not a sustainable long term strategy, but rather one born out of necessity after losing their homeland.
2. The end of liberal media propaganda which is intended to weaken host nations. Mainstream media is heavily controlled by Jewish owned companies, [an admitted fact](#). On the other hand is the controlled opposition known as neo-conservatism, which pushes a civic nationalist narrative and never addresses the core issue of identity and who really are "we the people".
3. The nationalization of central banks which control the money supply of non-Jewish states. This is also a source of animosity and is unsustainable. No knowledgeable people will submit to control of their currencies. President Woodrow Wilson [admitted](#) that he had made a colossal mistake in the founding of the Federal Reserve System.

These changes do not mean an end to relations and agreements between peoples and countries or a complete separation thereof. Just national separation. For example, America could still send aid to Israel if Arab countries continue their hostilities. It would be in our interest to do so, if the Arab countries were posing a greater threat to us(which is not even close to being the case currently). That said, if Israel and Jewry in European countries make themselves enemies by hostile actions, then the opposite would be in our interest of course. In a word, the relationship must be [reciprocal](#). So the future can go either way. This brings me to the very cause of the Jewish Question.

In order to make these changes of position and methods of operation, Jews would need to end the use of diasporic ethics(using deception to infiltrate and undermine foreign governments, even their so-called allies). There are [videos](#) where they discuss a future of having goy slaves (based on ancient outdated texts and ethos). There is also a video of the prime minister of Israel, Benjamin Netanyahu, discussing how America is under their control via jewish influence. With an attitude like that,you cannot expect to keep allies. They also put themselves in a collision course with all other nations with this mentality.

A Proposed New Constitution

23 Foundational Points of New Constitution

1. All Americans of European descent (minimum 3/4 European ancestry) form a new government as the natural right of self-determination.
2. A reevaluation of all foreign relations and treaties, to be renegotiated on the basis of what is good for the interest of our people. All foreign aid to be ended and only renegotiated on an emergency basis, with majority approval of the new government. All treaties/agreements/contracts with foreign governments must be reciprocal and tested for reciprocity on an annual basis by a random panel.
3. The continued ownership of all land currently held by the United States and the right to annex land with approval of the people on foreign land by vote or by hostile acts. This also includes the creation of a confederacy of any country or land in which European people live and are ruled by non-European leadership or leadership which is working for non-European people's interests. This includes any country under Freemasonic/Judaic control.
4. Citizenship is limited to only those of a minimum 3/4 European ancestry. Hostile religious or fraternal group membership disqualifies citizenship status. Low level (blue lodge) masons who have not been involved in subversive or hostile activity are exempted upon renunciation and the order disbanded.
5. Guests. Non-citizens only have guest status. Guests have protection from crimes of predation but cannot be on government panels, own land or own critical infrastructure. Work visas can be issued only for employment which is unable to be fulfilled by citizens. Work visas and temporary visas for investors are never issued on a permanent basis but rather 1 to 5 year terms. Guest workers pay into the welfare and retirement systems, even though they are ineligible, this is to bolster the funding of these systems as a kind of foreign worker tax. Tourists must have a sponsor who is personally responsible for the tourist not overstaying. To prevent illegal immigration a ID or passport is required for all housing, medical services, vehicle rentals and all government services.
6. Government employment can only be held by citizens. Only citizens can serve on juries and government panels.
7. Critical industries, including: media, energy sector, information technology, communication systems and military technology can only be owned by and staffed by citizens.
8. Immigration is limited to only those who qualify for citizenship and are of good moral character, excluding felons. Known collaborators with anti-American or anti-European elements are excluded from potential immigration. Immigrants must be self-sufficient

(ineligible for aid from the government) and have a citizen or institutional sponsor who is liable for their support if they are unable to or if they incur a public debt.

9. Exceptions for allies. People whose ethnicity disqualifies eligibility for citizenship but who have demonstrated through their actions to be allies qualify for lifetime residency status. They also qualify for 2x compensation for all property for themselves and their immediate family if they choose to relocate. In the case of a large number of allies, (over a million) an independent state can be negotiated.
10. All citizens shall enjoy equal rights, duties and protection under the law.
11. Anti-treason statute. Any citizen receiving monetary or other compensation from a foreign or hostile entity and whose actions are against the interests of the public good forfeits their citizenship and if damages can be proven are liable for damages incurred. A random panel will decide guilt and punishment up to banishment or death.
12. Anti-corruption statute. Any governmental official or member of a government panel who receives outside compensation to influence their actions will be considered an act of treason with the result of revocation of citizenship and are liable for all damages caused by their corruption. If their corruption caused bodily harm, or involved theft or fraud, the corresponding criminal charges will apply as an accomplice to a crime. A random panel will decide guilt and punishment up to banishment or death.
13. Abolition of the Federal Reserve System. The Government shall issue its own currency, be it physical and/or electronic, debt free.
 - a. A national bank shall be created to provide minimal interest loans to newly married couples and small businesses (interest is set to the minimum amount to cover costs). The interest shall be used for compensation of children. The higher the average IQ of the couple, the higher the number of children they receive compensation for. Below average IQ = \$25k mortgage compensation for each of the first 2 children. Above average IQ = \$25k mortgage compensation for the first 4 children. Above 120 IQ = \$25k mortgage compensation each for up to 10 children. (Note that 100 IQ is set at the average intelligence for the current population in calculating this IQ.) Amount of mortgage compensation is adjusted for inflation. This policy will influence the average IQ of the nation in an upward direction.
 - b. Criminal disqualification - felony conviction disqualifies eligibility for any future child compensation.
14. Confiscation of hostile owned property- any business or person found guilty of aiding in anti-european people (anti-white) activity will have all property nationalized. This includes activity from before the institution of this government.
 - a. This property will then be redistributed in a randomized selection to people who 1. aided in the creation of this government. and 2. who have experience in an industry which qualifies them for management of the property. The pool to randomly select the beneficiaries of the distribution will be randomly selected from a pool of the top 10% most qualified.
 - b. If the person/persons who inherit property this way show inability to productively and profitably manage the assets, in the cases of running at a loss

to the point of a risk of imminent failure/bankruptcy, or significantly below predicted output/productivity standards of the industry. In this case the state reserves the right to turn the property over to a public sale or random redistribution.

- c. The property will be distributed in the form of an interest free loan with a term of 30 years. Inability to repay the loan will result in redistribution of the property for the loan to a randomly selected citizen with experience in the industry who has 1. registered to be in the pool and 2. demonstrated qualification to manage the property.
15. Provision for the old and the disabled. A system of providing for the old and the disabled shall be established. Both public and private systems will be offered for the citizens to choose from. Only citizens (or the citizen's parents in the case of those under the age of 25, including Grandparents if the parent is under 25) with at least 25 years of residency who have paid into these systems will qualify for benefits. Management of an investment pool must demonstrate sound investment growth at a level to meet growing needs or be replaced.
 - a. Costs of compensation should be adjusted based on an individual's own contributions or detrimental actions to their own health. ie being overweight, smoking, drug or alcohol abuse. In other words, people should not cause an overburdening of the healthcare system by their own fault or if they choose to, their costs should reflect the increase or they may turn to private healthcare solutions which will not burden the state.
16. Education - all children of citizens will qualify for education through elementary and trade school levels. Higher education assistance for gifted students, as minimal interest loan with the college as final insurer. Interest is set to the minimum which covers costs of the program. Competing systems of both public and private schools will ensure proficiency. A voucher system will allow parents to choose which school to send their children to. Foreign sponsored, degenerate or otherwise hostile indoctrination are forbidden from all school systems.
17. Abolishment of foreign ownership of land. Non-citizens, non-citizen owned companies and corporations may only lease land, not own it outright. All foreign investment is subject to approval from the State.
 - a. To ensure stability and the safety of foreign investments, confiscation or nationalization can only occur when a company or ownership of a company is proven (by randomized panel review) to have acted in criminal, hostile or otherwise subversive manner toward the State or its people (including other allied European-descended peoples).
18. The state reserves the right of national service (draft) for all citizens in times of war. The draft is preceded by a voluntary period (length and quantity determined by a random panel of military experts) of recruitment enlistment. Following this, a random panel can approve a draft if deemed necessary.
19. All media operating within the country will be citizen owned, no foreign entity or person may own media within National territory. Any media owner found to be

- defrauding, spreading falsehoods or working for foreign interests (financial conflict of interest) will be charged with treason and lose their citizenship upon prosecution.
20. Non-citizens and foreign entities attempting to disseminate propaganda which undermines the Nation or its people will be banned, blocked from entry both physically and digitally and citizens will be forbidden from having business relations with the person or entity. If it is a foreign state conducting or otherwise contributing to this undermining, their diplomats will be expelled and barred from entry. A panel will then re-evaluate the reciprocity of the relationship with this country and create remedial actions each year until relations are resolved.
 21. Religious Liberty - all religions which do not incorporate practices hostile to the people of the Nation or have been proven to substantially act or have tenants which promote the undermining or hostility toward its people will be allowed. Based on historical experience this specifically outlaws Judaism and Islam.
 22. Initial government formation - the initial government will be formed by a vote of the members of the founders of the new government to form a central committee with the task of setting up the system for random panel selection, the departments and the military.
 - a. Syndicates in the form of private associations can exist for different classes, sectors and interests with the purpose of proposing laws and advocating improvements. Syndicates must allow entry by any citizen who meets any of the following conditions. Unless otherwise noted, these are entry requirements, not ongoing membership requirements;
 - i. Education or training in the industry of at least 1 year, and within the last year, or
 - ii. Work experience in the industry of at least 1 year, and within the last year, or
 - iii. Owned a business in the industry for at least 1 year, and within the last year, or
 - iv. In the case of religious syndicates, practiced the Religion for at least 1 year, and within the last year, or
 - v. Practiced the art or production of the output of the class of the syndicate for at least 1 year, and within the last year, and
 - vi. Not committed a crime of predation, fraud or corruption. (Ongoing requirement)
 - vii. Syndicate leadership loses status if found guilty of violating any statute of the constitution or conviction of felony. Replacement by vote of Syndicate members using random selection from a pool of candidates. Selection and randomization must be in an open process monitored by representatives of the government.
 - b. State officials and employees will be replaced via random selection from a pool of qualified candidates as selected by the panel using anonymization so that they do not know exactly who each candidate is.

- c. The President will serve terms of 10 years at which time a randomly selected panel can decide reelection or replacement with an anonymous majority vote. The President can decide at any time other than during war whether to voluntarily step down. Replacement will also be a random selection from a pool. Criminal prosecution of a felony or treason result in immediate replacement. The President's sole power is veto of any proposed federal law.
23. Amendments which nullify any part of this Constitution and the List of Rights and Protections are forever forbidden. This is because History has shown that undermining forces will find unforeseen ways of bending and changing the law to benefit them. Additions to the constitutions which do not undermine or interfere with the original law require the following votes: 2/3 vote of random panel in addition to 2/3 vote by all male, non-felon, land-owning citizens of age 25 or higher with IQs at 100 or above. President/King has veto power.
-

Rights and Protections/Prohibitions

Based on the United States' Bill of Rights as a foundation and adds further protections.

No law shall be passed which infringes on the following rights. These protections only apply to citizens.

1. All citizens have the right to free speech, no laws may be passed restricting this right. Exceptions; no public pornography, libel/defamation are subject to civil lawsuit or fraud. Companies/institutions or anyone engaged in disseminating media intended for the public are subject to lawsuit and criminal prosecution for intentional or repeated pattern of publishing falsehoods and/or libel or misleading content. Companies/institutions or individuals who work with foreign entities to produce propaganda or material deemed by a jury to have the intent of undermining are subject to forfeiture and the people responsible to banishment or capital punishment at jury's discretion.
2. All adult citizens of sound mental health and character, without violent criminal records, not currently addicted to or charged with possession of illegal substances within the last 2 years and not on psychoactive medication shall be allowed to purchase and carry arms. This includes any small arms which do not have radius explosive effects. Permits required for explosive or artillery armaments, only for use by regulated militias/security/defense companies. People whose condition no longer allow gun possession must forfeit owned guns until they meet the requirements once again and shall be compensated at 2x the market rate (as appraised by impartial 3rd party) if their weapons have been permanently confiscated.
3. No appropriation of private property without initial criminal prosecution or approval by civil trial. For criminal prosecutions, only crimes of treasonous nature/foreign influence shall lead to confiscation. Civil confiscation, ie "right of way" forfeiture shall be reimbursed at 2x the market rate (as appraised by impartial 3rd party).
4. No state mandated religion. Laws can forbid non-European based religions and religious organizations which are guilty of treasonous activity but no law shall be passed which requires the citizenry to practice it.
5. No excessive taxation. No citizen is required to pay more than 25% of their income in total taxes. Distribution maxes - 2% local, 8% State and 15% Federal. Entities/citizens who propose a new tax must pay an equivalent percentage increase in their own personal tax (and their descendants) as long as it is in effect, even if the proposed tax does not apply to them or their business.
6. Right to trial by peers. No imprisonment without trial and the right to a speedy trial (speedy trial means as soon as possible and excessive delays(more than 1 month) must be a) backed with evidence for reason for delay and b) the citizen shall be compensated for lost time, in the case that prosecution is not cause for loss of citizenship.)

7. Right to humane treatment while in captivity. Prison system conditions shall be tiered based on violent nature and severity of crime. Non-violent and violent prisoners shall not be commingled. Prisoners of different races or of hostile groups shall not commingle. Prison conditions for citizens shall not be in a condition which demonstrably leads to sickness in body or mind. Availability of work to improve conditions at no less than 1/5x the average wage for productive and cooperative prisoners must be available in the case of the non-violent. No judge or any person affiliated with the legal system is allowed to make a profit from the penal system. Corruption to profit or deny rights to prisoners shall be a treasonous offence. Capital punishment is allowed in cases of 1. treason, 2. premeditated murder, murder in the course of a theft or terrorism 3. corruption(repeated or foreign influenced) 4. pedophilia which caused harm/trauma to a child and 5. rape(violent or repeat offender).
8. Right to form regulated militias and community police. Citizens have the right to defend their property and to institute groups/fortifications to defend their property. Non-citizens/visitors are strictly prohibited from engaging in militia/policing activities. Community police are held to the same conduct standards (and liabilities) as government police.
9. Right to markets in health. No law shall interfere with the free market of health modalities, with the exception of addictive substances. Civil liability law and fraud protection shall ensure no deceptive or willfully harmful medical practices. No use of the law to create restrictive monopolies on the practice of medicine and creation/selling of medicine.
10. Right to work and prosper. No laws shall restrict the barrier to entry of business/workmen. Creation of hazards and fraud will be handled by civil court with repeat offenders subject to criminal prosecution. Knowingly creating law to create a barrier to entry of competitors via corruption shall be a treasonous offence. Never shall the State be used as an instrument of stifling domestic competition.
11. Right to know the law. All law shall be electronically published in an open and easy to access format to enable citizens/businesses to follow best practices and limit liabilities. The format shall be improved to make it understandable with clearly defined sections and updated annually to be current and improved.
12. Freedom from frivolous legal attack. The legal system shall not be used as a system of stifling legitimate competition or silencing citizens, ie lawfare. To prevent this, the loser of legal cases must pay for the fair market legal costs of the winner and the costs of the legal system.
13. Removal of patent system. Courts shall determine cases of fraudulent (counterfeit) copies of products instead.
14. Freedom from forced labor. No free citizen, meaning no person who has legal citizenship and has not been sentenced to restitution for a crime, shall be subject to forced labor.
15. Right to emigration and interstate travel. No law shall restrict a person who is not wanted for a crime, on bail, probation, subject to civil penalties, tax debts or subpoena from emigrating or free movement within the Nation. This does not prevent private

owners from limiting access to their property/businesses. The right to free association/dissociation by citizens shall not be infringed with the exception of access to utilities and communication systems unless by court order in the case of criminal abuse of said systems.

16. Right to family integrity. No child shall be taken from a parent without first criminal prosecution by jury. In the case of family separation both parents shall be given 50% time of custody or a mutually arranged custody agreement, with the exception being in the case of a parent being criminally charged or proven by criminal trial physical or sexual child abuse. All marriages require a prenuptial agreement to prevent legal ambiguities upon the case of separation. Prenuptial agreement must include an infidelity clause with stated terms of separation in the case of infidelity or a criminal case of spousal abuse. Children of 14 years of age or older can decide which parent gets custody rights and children under 14 may change custody rights once reaching the age of 14.
-

Immigration and Naturalization Screening

A combination of artificial intelligence(AI) and family records, criminal records and any other available record screening are used to identify if someone is of European origin and does not pose a risk of harm to determine immigration/citizenship eligibility.

The AI screening system will have a threshold of certainty for eligibility and require a DNA(saliva) sample be taken onsite for edge cases where the computer cannot determine race with high certainty. The system may also request additional records in the cases of uncertainty of identity or if the system detects any other risk, including but not limited to: possibly being a state actor, false identity, or association with hostile actors or known criminals.

The ability of AI to classify by race is already easy to implement and highly accurate. IBM is currently(2019) selling video analytics software that can classify by ethnicity.²⁴ China has racial profiling built into their police surveillance cameras.²⁵

Preventing infiltration by hostile actors

1. Screen social media of those applying for admittance.
2. Require a citizen sponsor whose own citizenship status becomes collateral against hostile/undermining or treasonous actions taken by a new immigrant.
3. An immigrant's relatives (out to third degree relatives, ie cousins, grandparents and grandchildren) which are already citizens are also subject to deportation if an immigrant is convicted of treasonous activity. Including but not limited to: spying, terrorism, bribery, spreading deceit or undermining via media apparatus.
 - a. In addition, an immigrant convicted of treasonous activities' relatives' (out to third degree) who are not citizens are barred from entry for life.
4. Foreign nations which are hostile or found to be not operating in a reciprocal relation with the Nation are barred from entry until they return to non-hostile and reciprocal relation status, as determined by a random panel during the annual relation review process.
 - a. Conviction of a spy or any other state-sponsored actor conducting undermining acts will result in their host nation being considered in non-reciprocal status for 1 year. After 1 year, the relationship with the offending nation will be reviewed and determined whether to extend or modify this status.
5. Conviction of using false identification, false information or attempting to deceive the screening system or immigration officials will be considered a high felony and subject to a prison term of up to 10 years. Spies are subject to capital punishment. Family out to the 3rd degree deported and barred from entry.

²⁴ [Attribute detection with Body Camera Analytics](#)

²⁵ [One Month, 500,000 Face Scans: How China Is Using A.I. to Profile a Minority](#)

6. Conviction for illegal immigration is considered a high felony and subject to a prison term of up to 10 years. Spies and state actors of foreign governments attempting illegal immigration are subject to capital punishment. Any who aided in the process of illegal immigration are also subject to felony with up to 10 years of prison. Family out to 3rd degree deported and barred from entry.
 - a. To prevent illegal immigration, identification (ID card or passport) are required for all essential services. Including but not limited to: vehicle purchase or rental, public transportation use, housing purchase or rental, public service use, and hospital entry or other medical care.

Immigration Policy

The first immigration act, the United States Naturalization Law of March 26, 1790, stated that only “free white persons...of good character” qualified for naturalization.

<p style="text-align: center;">—————</p> <p style="text-align: center;">CHAP. III.—An Act to establish an uniform Rule of Naturalization. (a)</p> <p>SECTION 1. <i>Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,</i> That any alien, being a free white person, who shall have resided within the limits and under the jurisdiction of the United States for the term of two years, may be admitted to become a citizen thereof, on application to any common law court of record, in any one of the states wherein he shall have resided for the term of one year at least, and making proof to the satisfaction of such court, that he is a person of good character, and taking the oath or affirmation prescribed by law, to support the constitution of</p>	<p style="text-align: center;">STATUTE II.</p> <p style="text-align: center;"><u>March 26, 1790.</u></p> <p style="text-align: center;">Repealed by act of January 29, 1795, ch. 20. Alien whites may become cit- izens, and how.</p>
---	--

Proposal 1

The founders of America were Western Europeans and they founded the country as a nation that while being independent of the monarchies of Europe, was a nation of Western Europeans. I propose returning to the standards of the 1790 Naturalization Act and include all European peoples of Nordic, Slavic or Mediterranean (which I mean the European racial type, not the Semitic) descent to become a pan-European nation.

Or

Proposal 2

If we want to narrow it down more, the northern states could be formed into Nordic, Slavic and Germanic states and Florida as a Mediterranean New Italy, with the Southwest becoming Spanish/Iberian. In essence an extension of Europe, which is what North America was founded to be, albeit separately by England, France and Spain.

Exception for allies – native Americans and descendants of African slaves.

Native Americans and the descendants of African slaves have a unique position which I acknowledge and therefore offer that allies within these groups can form their own autonomous states.

Balanced Taxation

The main theory of taxation under this system is that the sources are linked to the causes as close as possible. For example, the costs for investigating tax evasion are paid for using fines imposed on tax evaders.

For budgeting, the practice of spending as much as possible in order to justify ever higher budgets will be eliminated by limiting each cost to what its own separate income stream is. Another protection is that no agency can increase its own budget without review by an independent randomly selected panel (IRSP).

By linking the cost with the funding source, a decrease in cost will result in a decrease in taxation. IRSPs will balance out both sides' competing interests. Any concerned citizen or entity will also be able to sue for correction if they feel there is an imbalance (at their own cost if they lose the case).

Below is an outline of costs and sources of revenue for them. Since the government will primarily consist of a legal system, officials and military, the amount of costs for bureaucracy will be minimized.

<u>Cost source</u>	<u>Balancing force</u>	<u>Source of funds</u>
Military	Projected threats	Up to 1/4 of all tax revenues
Militia	Number of citizens to equip	Business tax
Officials	2x median income x the number of officials	Business tax
Bureaucracy	Number of cases/laws Number of employees needed	Legal Fees and Fines
Courts	Caseload	Legal Fees and Fines
Police	Level of criminal activity	Legal Fees and Fines
Schools	Number of children	Real estate tax
Border control	Pressures of illegal immigration Advances in technology to upgrade capability	Immigration fees
Emergency Prep	Threat assessment and disaster scenarios	Insurance fees

Taxation	Number of evasion cases	Fines from evasion
Immigration	Paid by fees from number of immigration applications	Immigration fees
Security	Amount of terrorism	Fees for documentation and identification
Space	Regular advancement projects done in cooperation with investors into space development/granting timed leases for mineral rights etc, in exchange for funding.	10% of military funding set aside to support civilian space colonization efforts. 20 year tax exemption for space infrastructure and research projects, support of voluntary fundraising.
Public transport and roads	Amount of traffic	Fuel and vehicle sales tax, population density income tax. Managed by states.
Disability and Retirement	Number of people entering retirement and disabled	Income tax
Child Mortgage Credit	Number of children to number of parents with IQ's that qualify	Real Estate Tax

Also refer to the Rights and Protections section about maximum taxation. Under article 5, “No excessive taxation. No citizen is required to pay more than 25% of their income in total taxes. Distribution maxes - 2% local, 8% State and 15% Federal. Entities/citizens who propose a new tax must pay an equivalent percentage increase in their own personal tax (and their descendants) as long as it is in effect, even if the proposed tax does not apply to them or their business.”

Compensation requirement

Compensation is required when creating new laws which affect a person’s property or income. This does not apply to taxes, tariffs, fees, penalties or protectionary measures imposed to prevent harmful activities. The person affected will be compensated 2x the market value of property and in the case of loss of income, a one time compensation equivalent to 10x the lost income of the previous year (starting from the date of filing), which can be proven to be caused by the new law. Criminal charges relating to fraud, assault, theft or treason in relation to the case (post and pre-case) will cause ineligibility/forfeiture of entitled compensation. The compensation is to be paid by the entity which proposed the creation of the law.

Option to opt-out for public services

Citizens who wish to turn to the free market for publicly offered services such as schooling, retirement funding, medical services can opt-out. Upon opting-out the citizen is no longer required to pay the tax which funds the service. If they wish to opt-back in after this though, a balance of their taxes paid in will be assessed and they are not permitted to exceed this level of benefit. This is to prevent abuse. A citizen cannot opt-out then wait until they need expensive medical care and then opt-back in.

The option to opt-out does not apply to critical services like, national identification systems, paying to support the police, military, roads, court system, disaster preparation and relief, etc.

Law making, Government Body Creation and War

1. National Law
 - a. New laws and changes to existing laws are proposed by citizens (or groups) (at their expense for the costs of processing). The law is then checked for constitutional eligibility by a legal team of randomly selected lawyers. 2/3 vote to pass.
 - b. If approved, it is voted on by a random panel of experts and is passed by a 2/3 vote.
 - c. National law takes precedence over regional and syndicate law. Regional and Syndicate Law have equal weight and conflicts are decided by a random panel of experts.
2. Regional Law
 - a. Citizens can propose laws or changes to existing law. The law is then checked for constitutional eligibility by a random lawyer panel. 2/3 of votes to pass.
 - b. If approved, the law is then checked for merit by a random panel of citizens from the region with applicable knowledge and/or experience. Simple majority of panel votes passes. Then the bill is put forward to the Governor of the region for signature or veto. Veto can be overturned by a 2/3 majority vote from another independent, randomly selected panel of experts.
 - c. Tariffs and laws which impose costs on or impede commerce of other states are forbidden.
3. Syndicate law

- a. Members of syndicates can propose new laws or changes to law(at their own expense and fees for the deciding of the law paid by the proposing interests).
- b. Constitutionality of law is decided by a randomly selected group of lawyers. 2/3 of votes to pass.
- c. Panel made from randomly selected members of the syndicate then evaluate and vote on the passing of the law. 2/3 of votes to pass.

Notice that there is no case law. Panel members can review previous cases, but it is not law. Law is only created independently of actual cases.

State and Local Governments

State and local government officials are randomly selected from a pool of candidates who have lived in the applicable district a minimum of 25 years. This pool of candidates is chosen based on merit by a random panel with experience in the position's field. Manipulation of this process is a treasonous offence.

Adding new states/countries

Countries with ethnically European populations that are currently under the control of non-European influenced governments will be supported in overthrowing their puppet governments. They can then join in alliance with our government under terms that maintain the independence of each state and only allow for voluntary agreements between the states. No laws can be imposed on the citizens of member states by the alliance which violate this constitution. Law making via the alliance will only apply to interstate transactions, for example trade, extradition of criminals and immigration.

Military alliances

Military alliances are only for defense purposes with the exception of super majority vote by random panel. For example, if a member aggresses on a non-member nation and starts a war, other members are not responsible for defense of that member country, unless an alliance is created by a random panel. If a member nation is attacked without provocation then all members are obligated to aid in defense. Failure to do so results in expulsion from the alliance.

Wars against European people states - The "no brothers war" mandate

To prevent a repetition of the disasters of the past Civil wars, wars which involve other nations of (predominantly) European peoples are only allowed in the case of direct attack. Mass

targeting of European civilians is prohibited. Monthly decision to continue and proposal of terms of peace are to be offered, set by a random panel.

Protection of European peoples mandate

If European people in other nations are under threat of displacement, genocide or persecution, a panel will be formed to decide the severity and to propose methods of persuasion to end it while minimizing costs and risks. These can include warning > tariffs > embargo > multinational sanctions > covert actions > limited war until violations cease > full scale war. Declaration of war requires an independent 2nd panel vote.

Toward a true meritocracy

One of the greatest injustices of nearly all societies is that of the failure to give opportunity to those of talent. Too often due to nepotism and the circumstances of birth, you then have a case of an inept person wielding immense power due to inherited wealth and political influence. A person should rise with their abilities, effectiveness and effort.

To achieve the meritocracy some protections and programs can be instituted including;

1. An educational system which tests and awards based on blind(anonymized) proof of achievement and potential. The children who show the most capability to excel in a field which the nation is in need should have the opportunity to have a paid scholarship. The scholarship could come with a requirement to work in the chosen field and a portion of wages paid back into the scholarship program.
 2. Labor organizations of trades rather than trade unions. Employment trades would have government representative groups(houses of representation) and these groups would require the use of anonymized acceptance, apprenticeship and advancement based on merit.
 3. Anti-nepotism restrictions and merit-based advancement requirements for all publicly traded companies. If a company is public, it must be open to the public advancement and be in line with the interests of the people. This is not government ownership of companies but rather a protection against companies becoming nepotistic houses of power to wield control over the population, which we see in modern corporations.
 4. Public office and position appointment via anonymized merit based application processes. Promotions will also use the same anonymized process to avoid conflicts of interest and people using the power of appointment for their own ends.
-

Path Forward - Accelerant

How to counteract the methods of the nation wreckers

Here is a short list of common methods used and how to counteract them;

1. Divide & Conquer – they turn groups and nations against each other. Warn others of these tactics and point out how people have been used to cause them to turn on each other.
2. Financial control – nationalize or outlaw their banks and replace them with our own.
3. Propaganda – Allow only citizens to own media and to distribute media within the Nation. Outlaw deceptive and undermining practices. Publicly expose their methods to make the citizens more wary of their techniques.
4. Top down control – their methods of influence depend on gaining control over key figures, expose the corruption and traitorousness of their agents to destroy their control. Randviscracy prevents infiltration through the use of random panels and checks.

Exploiting their weaknesses

Below is a list of common weaknesses of the type of people who gravitate toward parasitism. Knowing these tendencies, you can predict their actions and form counteractive strategies.

1. Greed – Document and expose their crimes. Investigate their crimes such as tax evasion, insider trading and bribery. Set traps to ensnare the corrupt.
 2. Paranoia – Use their fear to goad them into overstepping and making tactical mistakes.
 3. Arrogance – expose their elitist nature. Wounding their pride can make them act irrationally.
 4. Fragility – because they only control small numbers of people in key positions, essentially the “emperor has no clothes”, meaning their control is an illusion, like the Wizard of Oz behind the curtain. It is a house of cards which will fall under strain.
-

The system is fragile and is dependant upon cooperation

The reality is that there is little to stop a revolution from toppling a government in a modern democracy. Why? Let's look at what would be the situation in the hypothetical event of a modern revolution.

1. The infrastructure is spread over a vast area and susceptible to sabotage. Electrical, gas, water are all impossible to guard and time consuming and expensive to repair.
 2. Most people and institutions do not have long term stockpiles of food and water. An interruption would cause chaos within days. Just look at the history of the immediate looting which occurs during every natural disaster. A month of disruption and the entire empire would crash of its own weight.
 3. The military and police are patriotic people by nature and would not attack a popular uprising which aligns with their traditional values. To the contrary, many would defect. Many of them have seen the results of globalist wars in the case of the military and the effects (increased criminality/violence) of forced diversity in the case of the police.
 4. Many people are not content with current leadership and would aid in its replacement.
 5. The opposition to nationalists consist largely of astroturf (construct) organizations which only appeal to the most degenerate in society and many times rely on paid participants to put on the appearance of strength. These are not the caliber of people who would be willing to fight in a prolonged struggle.
 6. The uprising would most likely spread to other countries once large scale disruption is achieved. These nations would then need to use their armed forces for their own security and could not afford to risk them in trying to retake a country lost to nationalist revolt.
-

Opportunity

The Chinese word for problem is the same as the word for opportunity. Where there is a problem, there is a demand for a solution. The failings and corruption of the current establishment creates an opportunity to give people what they desire. Real change. Leadership who is sincere in purpose and uncorrupt. Record levels of people have lost faith in the current system.

To limit the growth of opposition, the powers that be's only option is to restrict freedom of speech and freedom of association. Their tightening of controls gives legitimacy to their opposition and repels support.

Conclusion

All people desire self-determination. The return to rationality and the enforcement of reciprocity is inevitable.

Like the idea of Randviscracy? Want to end rampant corruption?

Everything changes with time. My goal in writing this book is to promote the idea of a government which minimizes corruption so that when change does come, these ideas will be known. You can help. Let people know about the ideas you have read here and if you have the means, support the promotion of Randviscracy by becoming a supporter at **randviscracy.com**
